TITLE	Performance Report of Educational and Vocational Services and Results for Individuals with Disabilities, 1996-1997.
INSTITUTION	New York State Education Dept., Albany. Office of Vocational and Educational Services for Individuals with Disabilities.
PUB DATE	1998-11-00
NOTE	525p.
AVAILABLE FROM	NYS Education Dept., Office of Vocational and Educational Services for Individuals with Disabilities, Strategic Evaluation Data Collection, Analysis and Reporting, Room 1624 One Commerce Plaza, Albany, NY 12234 (free).
PUB TYPE	Numerical/Quantitative Data (110) -- Reports - Evaluative (142)
EDRS PRICE	MF02/PC21 Plus Postage.
DESCRIPTORS	Compliance (Legal); *Disabilities; Early Intervention; Educational Change; *Educational Legislation; Educational Trends; Elementary Secondary Education; Federal Legislation; Federal State Relationship; Inclusive Schools; *Special Education; State Federal Aid; Strategic Planning; Tables (Data); Trend Analysis; *Vocational Rehabilitation
IDENTIFIERS	*Individuals with Disabilities Education Act; *New York

ABSTRACT

This New York report complies with the requirements that states document performance of educational and vocational services funded under the federal Individuals with Disabilities Education Act. The report is based on New York's strategic plan of goals and objectives and presents data and analyses which indicate current status and trends. Positive trends include: more inclusion of students in general education programs; high participation and improved performance of students with disabilities in state assessments; improving percentages of students with disabilities who graduate; and an increasing percentage of students with disabilities who enroll in higher education. Trends indicating areas of need include improved student proficiency in reading and mathematics, and the need to increase access to Regents-level instruction and examinations. Individual sections of the report present tables, graphs, and analysis concerning: (1) the early intervention program, (2) the preschool grant program, (3) the state grant program, (4) stage agency and state-operated/supported programs, (5) the vocational rehabilitation program, and (6) the strategic plan. Six appendices provide detailed data for individual school districts concerning students exiting special education, student participation in state assessments, and student numbers and disability classifications as well as a glossary of abbreviations and terms. Portions of this publication can be made available in a variety of formats, including braille, large print or audio tape, upon request. Inquiries concerning this policy of nondiscrimination should be directed to the Department's Office for Diversity, Ethics, and Access, Room 152, Education Building, Albany, NY 12234.

PERFORMANCE REPORT OF EDUCATIONAL AND VOCATIONAL SERVICES AND RESULTS FOR INDIVIDUALS WITH DISABILITIES, 1996-1997

ERRATA PAGE

Subsequent to publishing the Performance Report for 1996-97, the need for the following three types of corrections/updates in data summaries has been identified.

- Appendix C-2 (District Summary of Student Placements for All Disability Categories) lists incorrect totals for each county. The corrected totals are provided below. All other numbers and percentages reported in this appendix are correct.
- In page VI.59, the top chart (Percentages of School-Aged Students with Disabilities (Ages 6-21) in General Education Buildings) lists incorrect data for 1996-97. (All other data reported in this chart are correct.) A revised chart, with corrected data is included on the reverse side of this page.
- In page VI.77, the lower pair of charts list Enrollment of Individuals with Disabilities in Other Postsecondary Education Programs. As a result of ongoing verification procedures, revised data are now available for the number of individuals attending Tech Prep Programs in 1996-97. (All other data in this chart and all data in the Adult Education Enrollment chart are correct.) These two charts are included on the reverse side of this page, with revised data for Tech Prep Programs in 1996-97.

SUBJECT: Performance Report of Educational and Vocational Services and Results for Individuals with Disabilities

I am pleased to provide a copy of the Performance Report of Educational and Vocational Services and Results for Individuals with Disabilities for 1996-1997. The New York State Education Department is required to submit this report to the United States Department of Education pursuant to the Individuals with Disabilities Education Act (IDEA), as the improvement of educational results is a federal as well as a State priority. As we bring about broad based education reform, it is important to ensure that students are not inappropriately restricted from participation in innovative and challenging educational programs nor from inclusion in accountability procedures due to considerations such as age, gender, race, religion, martial status, or disability.

During 1995-96, a strategic plan of goals and objectives was adopted by the New York State Board of Regents and its Education Department to raise the level of learning for all New Yorkers. This report is based on the Strategic Plan and provides a clear and comprehensive basis for program evaluation and program planning at the State, regional and local levels. It includes information regarding the alignment of discretionary projects and initiatives with Strategic Plan goals and objectives, and presents data and analyses which clearly indicate status and trends.

The analyses of data presented in Section VI indicate a number of positive results and trends. More students with disabilities are receiving services with nondisabled peers and are being provided meaningful access to the general education curriculum. A very high rate of participation of students with disabilities in the State assessments has been maintained and performance in such assessments has improved substantially. In a tandem manner, the percentage of students with disabilities graduating with Regents diplomas, local high school diplomas and high school equivalency diplomas has continued to improve, and individuals with disabilities comprise a greater proportion of higher education enrollment. By the same token, we must recognize areas in which performance is unacceptable. Most notable in this regard are the continuing trends to identify greater numbers of students as having disabilities, the need to improve student proficiency in reading and mathematics, the need to increase access to Regents-level instruction and examinations and the need to increase opportunities for students with disabilities to be educated in general education buildings with their nondisabled peers. Educators, parents, students and the State Education Department must steadfastly maintain a strong commitment to improve the results of special education programs and services for students with disabilities.

If you have questions regarding this report, please contact the Office of Vocational and Educational Services for Individuals with Disabilities (VESID) at the address or telephone number indicated on the last page of this publication.

EXECUTIVE SUMMARY

This report includes performance data and information regarding the appropriate provision of special education and vocational rehabilitation programs and services to children, youth and adults with disabilities in New York State for the period October 1, 1996 to September 30, 1997. Pursuant to Part B Section 611 and Section 619 of the Individuals with Disabilities Education Act (IDEA), it has been prepared by the New York State Education Department for the United States Department of Education and the Congress of the United States of America.

On December 2 (In 1996, December 1 fell on Sunday, therefore the count date was moved to Monday, the second.), 1996, individualized education programs were implemented for a total of 427,936 children and youth with disabilities (birth to 21 years of age) statewide. There were 380,320 school-aged students with disabilities, ages four to 21, which was 11.6 percent of the 3,290,150 students enrolled in public and nonpublic schools, kindergarten through grade 12. Based on the number of all students with disabilities counted on December 1, 1995 (407,421), New York State received federal allocations, pursuant to the IDEA, amounting to $191,007,194. Additionally, the State received allocations pursuant to the Vocational Rehabilitation Act and Title VI-C Supported Employment amounting to $99,197,407. This investment in individuals with disabilities has produced the following results which are documented in this report.

- 70.8 percent of students with disabilities who have completed secondary education graduated with a Regents, Local or High School Equivalency Diploma. The number of students with disabilities who earned a Regents or Local high school diploma increased for the eleventh consecutive year.

- 92.2 percent of students with disabilities participated in the State Assessment Program. Moreover, 63.7 percent of students taking such tests achieved the Statewide Reference Point (+12.4 percent since 1995-96).

- The number of students with disabilities in general education classrooms approaches the national average. 37.2 percent of preschool students received services in integrated or natural settings (+4.9 percent since 1995-96). 42.8 percent of school-aged students with disabilities were educated in general education classrooms with support (+1.2 percent since 1995-96).

- 4.5 percent (18,418) of preschool and school-aged students with disabilities were declassified and returned to general education full time. Of the students declassified, 3,469 were preschool students (10.7 percent declassification rate) and 14,949 were school-aged students (3.9 percent declassification rate).

- 2.8 percent (27,900) of individuals attending institutions of higher education were self-identified students with disabilities (+7,801 since 1991-92).

- 16,487 individuals with disabilities were placed in jobs through the provision of VESID services (+7,314 since 1991). Since 1991, there have been consistent annual increases in the number of individuals placed in competitive employment (5,450 in 1991; 11,131 in 1997) and supported employment (668 in 1991; 2,671 in 1997). During the same time period, the number of individuals placed in sheltered employment decreased from 2,373 in 1991, to 1,857 in 1997.

- The total annualized first-year earnings of these 16,487 individuals amounted to $186.9 million (+$15.9 million since 1995-96). In addition, savings in public assistance increased by $3.6 million, from $19 million in 1995-96, to $22.6 million in 1996-97.

FOREWORD

The Performance Report of Educational and Vocational Services and Results for Individuals with Disabilities, 1996-1997 is a product of the New York State Education Department, Office of Vocational and Educational Services for Individuals with Disabilities (VESID). It has been prepared in a manner which conforms with instructions and recommendations received from the United States Department of Education, and contains performance data and information to be considered by the Congress of the United States of America in evaluating the efficacy of New York State's system for the provision of services to individuals with disabilities.

This edition of the Performance Report uses the same format established for the publication completed for 1995-96. In that VESID is responsible for the coordinated provision of services to individuals with disabilities at all stages of life, from birth through adulthood, it comprehensively addresses the provision of services to all New Yorkers with disabilities in sections I through V. These sections are arranged in chronological order, beginning with the Early Intervention Program (for children with disabilities, birth through age 2) and ending with the Vocational Rehabilitation program (for adults with disabilities).

The contents of this report are strongly directed to the State Education Department Strategic Plan to raise the knowledge, skill, and opportunity of all the people in New York. The data and analyses presented in Section VI have been enhanced to promote and facilitate data-driven decision making at the State, regional and local levels. Data are presented, for the first time, regarding Regents examination access and performance by students with disabilities, as well as the postsecondary education plans of such students. Other data collected/reported for the first time include the extent to which students attend their home school, the settings in which students with disabilities are provided services by Boards of Cooperative Educational Services (BOCES) and the incidence of student suspensions. Also, many types of data are presented according to BOCES regions, and the appendices have been expanded to provide more data for individual school districts.

Copies of this report will be broadly distributed within the State Education Department and throughout New York State to the Commissioner's Advisory Panel on Special Education, school districts, Boards of Cooperative Educational Services, student/parent advocacy groups and to other appropriate agencies and organizations. This report is indicative of the commitment of the New York State Education Department to continuous improvement and provides a basis upon which improvement may be measured.

OFFICE OF VOCATIONAL AND EDUCATIONAL SERVICES FOR INDIVIDUALS WITH DISABILITIES

The mission of the Office of Vocational and Educational Services for Individuals with Disabilities (VESID) includes an expanded role in developing and coordinating appropriate services so that people with disabilities can lead self-sufficient, self-directed lives to the maximum extent possible. VESID provides vocational rehabilitation services and coordinates life-long educational services for individuals with disabilities to assist in expanding and enhancing their opportunities to live and work independently in their communities. Office planning and initiatives are directed toward the establishment of mechanisms to ensure that individuals with disabilities will continue to have their needs appropriately met, throughout their lives if necessary, as they grow from infants and toddlers to preschoolers, as they progress through elementary and secondary education programs, and as they pursue higher education and employment opportunities.

The appropriate provision of programs, services and accommodations is not an issue only in elementary and secondary schools; it is also an important consideration in identifying and pursuing postsecondary education and employment opportunities. VESID offers access to a full range of services that may be needed by persons with disabilities at every stage of life. In administering both the special education and vocational rehabilitation programs, VESID's mission is threefold:

- Promote educational equity and excellence for students with disabilities while ensuring that they receive the rights and protections to which they are entitled;

- Assure appropriate continuity between the children and adult services systems; and

- Provide the highest quality vocational rehabilitation and independent living services to all eligible persons as quickly as those services are required to enable them to work and to live independent, economically productive lives.

The foundation for adult success is built during the school years. The system established by VESID to administer educational and vocational services fosters such success and has evolved into a model designed to appropriately meet the needs of people with disabilities and produce results.

SECTION I

1996 - 1997

PERFORMANCE REPORT

For

EARLY INTERVENTION PROGRAM

VESID

Prepared for the

UNITED STATES DEPARTMENT

OF EDUCATION

By

THE NEW YORK STATE

EDUCATION DEPARTMENT

I. Early Intervention Program

OVERVIEW

The State Education Department (SED) maintains a collaborative relationship with the State's early intervention lead agency, the Department of Health (DOH), to ensure coordination between the early intervention system (serving infants and toddlers with disabilities, birth to two years of age), under Part H of the Individuals with Disabilities Education Act (IDEA) and the preschool special education system under Part B of IDEA. During 1996-97, SED and DOH finalized the interagency agreement regarding the coordination of responsibilities under the State's early intervention program for infants and toddlers with disabilities, pursuant to Title IIA and Article 25 of the Public Health Law. Under the agreement, both agencies will retain joint responsibilities to implement the State's early intervention program and to ensure the smooth and appropriate transition from the early intervention system to the preschool special education system, beginning at age three.

The State Education Department, Office of Vocational and Educational Services for Individuals with Disabilities (VESID) activities during 1996-97 included the following:

- Participation in the State Early Intervention Coordinating Council (EICC), which advises and assists DOH in the development of the early intervention system;
- Participation in the development of early intervention legislation and regulations;
- Provision of training and technical assistance to local school districts regarding their role in the transition of children with disabilities to the preschool special education system;
- Provision of training and technical assistance to the network of Early Childhood Direction Centers (ECDCs) regarding their role as primary referral sources (ECDCs are described in greater detail in Section II, page II.6);
- Approval of early intervention evaluators, service providers and service coordinators; and
- Implementation of Quality Assurance monitoring of programs approved by SED to assure compliance with regulations.

DOH's December 1, 1996 report on infants and toddlers receiving early intervention services indicates that 15,149 infants and toddlers with disabilities received services under the State's early intervention system. There were 271 approved preschool special education programs which are also approved to provide early intervention services. Of that number, 91 were approved by SED; the remainder were approved by DOH. New York State received an allocation pursuant to IDEA, Part H, in the amount of $20,119,188.

MONITORING

SED monitors agencies approved to provide early intervention services to determine whether services and practices are in compliance with applicable laws and regulations. Monitoring procedures and protocols, jointly developed by SED and DOH, include the dissemination and review of annual monitoring questionnaires and on-site monitoring reviews. Programs operated by school districts, Boards of Cooperative Educational Services (BOCES) and private day schools are monitored by SED personnel. During 1996-97, 21 on-site program visits were completed by SED monitoring personnel. Corrective action plans have been developed and implemented at the local level. Technical assistance was provided by SED and DOH personnel.

ADVISORY GROUP PARTICIPATION

SED is represented on the State Early Intervention Coordinating Council (EICC); reciprocally, DOH participates on SED's Commissioner's Advisory Panel on Special Education Services. As a result of these actions, coordination between the agencies is enhanced.

TECHNICAL ASSISTANCE AND INFORMATION DISSEMINATION

DOH and SED share information to facilitate the appropriate provision of services to children with disabilities, ages birth to five years. This includes sharing brochures and other printed materials regarding procedures for obtaining early intervention services. SED continued to provide information and technical assistance related to the appropriate transition of infants and toddlers with disabilities from the early intervention program to preschool special education services (pursuant to Section 4410 of New York State Education Law), beginning at age three. Effective October 1, 1996, an amendment to Section 4410 of the Education Law required that, with parental consent, approved evaluators and Committees on Preschool Special Education (CPSEs) be provided with the most recent evaluation reports for a child in transition from an early intervention program. In addition, SED developed and disseminated a field memorandum, encouraging school districts to participate in their regional Local Early Intervention Coordinating Council.

SED-DOH COLLABORATION

SED and DOH provided each other with available data and information needed for policy determinations in a manner consistent with federal law. The two agencies continue to assist each other in the development of clinical practice guidelines, which are being developed by DOH for children with disabilities, birth to age two, and by SED for children with disabilities, ages three to five. Additional statistical information pertaining to the early intervention program and other DOH programs is available from DOH in the publication, Child Adolescent Health Profile.

COMPREHENSIVE SYSTEM OF PERSONNEL DEVELOPMENT

DOH and SED are responsible for the implementation of a Comprehensive System of Personnel Development (CSPD) plan which provides for preservice and in-service training to be conducted on an interdisciplinary basis, and makes training available to the various types of personnel who provide services pursuant to IDEA Part C (DOH) and Part B (SED). During 1996-97, SED and DOH personnel initiated discussions to improve coordination and collaboration in this area.

by

THE NEW YORK STATE

EDUCATION DEPARTMENT

II. PRESCHOOL GRANT PROGRAM, SECTION 619 IDEA

OVERVIEW

During the 1996-97 school year, a number of activities were accomplished at the State and local levels related to the development of a statewide comprehensive service delivery system for students with disabilities, ages three to five. On December 2, 1996, special education and related services were provided to 49,590 preschool students with disabilities, ages three to five. Of these students, 32,467 received preschool special education programs and services pursuant to Section 4410 of New York State Education Law; 17,123 received school-age programs and services. (During the entire 1996-97 school year, more than 44,551 preschool students with disabilities were provided special education programs or services pursuant to Section 4410 of New York State Education Law. Data are not available regarding the total number of school-aged students with disabilities provided special education programs and services during the entire 1996-97 school year.) New York State received an allocation pursuant to the Individuals with Disabilities Education Act (IDEA), Section 619, in the amount of $31,630,327.

DISSEMINATION OF INFORMATION

During 1996-97, the State Education Department (SED), Office of Vocational and Educational Services for Individuals with Disabilities (VESID) prepared and disseminated a number of memoranda regarding preschool special education policy. These materials have been widely distributed statewide to local education agencies, approved private schools, approved preschool programs, municipalities, student and parent advocacy networks, statewide advisory committees and training networks. Disseminated information and policy documents include:

- Increasing Integrated Opportunities for Preschool Children with Disabilities - March 1997
- Guidelines for Services for Culturally and Linguistically Diverse Preschool Students with Disabilities Ages 3-5 - March 1997
- Guidelines for Preschool Program Advertising - March 1997
- Local School District Participation on Local Early Intervention Coordinating Councils (LEICC) - April 1997
- Updated Part 200 Regulations of the Commissioner of Education - April 1997
- Addendum to April 1997 Updated Part 200 Regulations of the Commissioner of Education - June 1997
- Need for Evaluators for Limited English Proficient Students with Disabilities - June 1997

PRESCHOOL LEGISLATIVE REFORM

During 1996-97, numerous activities were undertaken to implement the statutory changes enacted during the 1996 legislative session to improve the preschool special education system in New York State. The following activities were implemented:

Implementation and Training

SED personnel conducted statewide training for staff of school districts, municipalities and approved providers (both public and private) to ensure accurate and consistent understanding of recently enacted amendments to New York State Education Law and the Regulations of the Commissioner of Education regarding the provision of special education programs and services to preschool students with disabilities, and, in particular, the new continuum of services. More than 2,000 individuals participated in the initial training, and an additional 300 representatives of boards of education and Committees on Preschool Special Education (CPSE) chairpersons received follow up training, which focused on considerations for placement in the least restrictive environment.

Reducing the Costs of Transportation

As a result of an amendment to Section 4410 of the Education Law and in an effort to more effectively manage transportation costs for preschool students with disabilities statewide, the Board of Regents amended the Regulations of the Commissioner by adding a new paragraph (4) to Section 200.9(f), effective July 1, 1997. The amended regulations, consistent with statute, authorize a standardized method for establishing regional maximum rates for State reimbursement to the county for transportation of preschool students with disabilities.

Revision of Rate-Setting Methodology to Improve Integration and Cost Efficiency

In 1996-97, a work group which included consumers external to SED was established to review the rate setting methodology for preschool special education programs. The work group was to share information and develop recommendations relating to changes in program and/or rate-setting which would increase cost efficiency and the placement of students in less restrictive settings. The work group provided its report to the SED Chief Operating Officer, and the Deputy Commissioner for VESID.

Integrated Services

The Board of Regents endorsed the goals of increasing the provision of preschool special education services in integrated settings to the provision of services which are commensurate with individual student needs, and increasing the number of preschool students with disabilities who receive related services in natural settings. Toward the achievement of these goals, statutory and regulatory amendments governing the provision of preschool special education were enacted, directing CPSEs to consider the appropriateness of providing special education services in settings with age-appropriate peers without disabilities. The statute further requires that CPSE recommendations to the board of education must indicate the reasons why less restrictive placements were not recommended.

Including Children with Disabilities in Day Care Centers

The State Education Department, in consultation with the Office of Children and Family Services (OCFS) produced a video-teleconference which aired on June 26, 1997. The teleconference was part of a training program for day care providers, and was broadcast to 46 down-link sites, including 13 in states outside of New York. Through this approach, information was provided to day care providers on including preschool children with disabilities in day care settings. Approximately 1,500 participants viewed the teleconference which included highlights of children with and without disabilities in typical day care centers. Participant feedback was very positive, with approximately 75 percent of those who viewed the teleconference noting that they have already made or will make necessary changes to increase the inclusion of preschool children with disabilities in day care settings.

Clinical Practice Guidelines

Legislation required SED to develop clinical practice guidelines in consultation with a broad-based group of professionals and parent representatives. The clinical practice guidelines will assist evaluators with appropriate diagnosis and evaluation. They will also be considered by CPSEs in developing individualized education program (IEP) recommendations (with respect to the type, frequency and duration of services) to appropriately address the specific needs of each student, through the provision of related services in natural/less restrictive environments. At the close of this project year, the guidelines remain under development.

Special Education Itinerant Teacher Services

All preschool special education providers were required by new legislation to submit applications to SED in order to provide special education itinerant teacher (SEIT) services. These services are expected to effectively meet the needs of individual children in less restrictive/natural environments, since the itinerant teacher can deliver services in a variety of settings such as Head Start, Day Care and the home. It is anticipated that these services will also be more cost effective. VESID developed and disseminated application materials to approved preschool special education providers. The number of SEIT programs increased by 27 percent during 1996-97.

Pre-kindergarten and Head Start

In 1996, an agreement was reached by VESID and the Office of Child and Family Development to increase the number of students with disabilities placed in State-funded pre-kindergarten programs. School districts were directed, as part of their application for pre-kindergarten funding, to mirror the percentage of school-age children with disabilities in the pre-kindergarten program. Data to determine the effect of this directive are still being analyzed. The initiative to include preschool students with disabilities in pre-kindergarten programs will now be intensified as a result of the State budget, which provides funds to increase pre-kindergarten availability for children four years of age. In August 1997, the State Legislature enacted Chapter 436 of the Laws of 1997, which established provisions for a Universal Pre-kindergarten Program for all eligible four year old children in the State, if their school district chooses to participate. VESID is involved in State level activities to promote the full inclusion of four-year-old children with disabilities in the Universal Pre-kindergarten Program. The SED is currently developing regulations and planning regional sessions to disseminate information regarding the new law.

VESID is also collaborating with Head Start representatives to revise the Memorandum of Understanding and to continue efforts to serve preschool students with disabilities in Head Start Programs.

Business Plans

Pursuant to State statute, all approved preschool special education providers were required to submit, by January 1, 1997, business plans which redirected personnel and fiscal resources toward providing special education programs and services in settings with children who do not have disabilities, and reduce reliance upon programs in settings which include only preschool students with disabilities. Programs were to redirect 25 percent of their segregated placements (i.e., attended by students with disabilities only) over the next two years. Statewide training was conducted and technical assistance was provided regarding this requirement. All business plans have been approved. Providers with approved business plans must submit a progress report on the status of their efforts to implement proposed activities. SED personnel will continue monitoring approved providers on the implementation of the business plans and will propose any necessary adjustments which are determined to be warranted.

DATA COLLECTION AND IDENTIFICATION OF TRENDS

Preschool Special Education Child Count and Placement Data

SED recognized a need to obtain more complete data regarding the number of preschool students with disabilities, as the December 1 count underrepresents the total number of preschool students during an entire school year. In 1996-1997, for the first time SED began collecting current data on child count and program setting to provide information about enrollment growth and trends, and the types of programs and services provided to such students.

Preschool Placement Study

SED awarded a competitive contract to MAGI Educational Services, Inc. to conduct a data collection study on the placement of preschool students with disabilities. In February 1997, the results of the study were reported and disseminated statewide. The following results were reported:

- 60 percent of preschool students with disabilities received special education services from the same agency where they were evaluated.

- 75 percent of preschool students with disabilities received special education services in classroom settings, rather than in less restrictive environments such as related services and/or special education itinerant teacher (SEIT) services.

- More than 80 percent of the classroom placements statewide were in segregated classrooms, serving only students with disabilities.

- 80 percent of preschool students with disabilities required special education services when they become school-age.

- As preschool students with disabilities transitioned to school-age programs, few moved to less restrictive environments. Most received the same level of or more frequent related services per week.

- Four times as many preschool students with disabilities received 12-month school programs than school-age students with disabilities.

- Preschool special education services were more intense and more classroom-based than early intervention services and programs.

Data Comparing Other Large States

New York State serves a high percentage of the resident population of 3-5 year old children, and has the highest preschool special education incidence rate of the seven largest states (California, Florida, Illinois, New York, Ohio, Pennsylvania and Texas) as follows:

State	Incidence Rate	Number of Students
New York	5.82 percent	48,536
Illinois	4.51 percent	24,967
Florida	4.50 percent	27,080
Pennsylvania	4.17 percent	20,586
Ohio	3.79 percent	18;204
Texas	3.42 percent	32,262
California	3.21 percent	54,795
United States	4.51 percent	584,441

(Source: The 19th Annual Report to Congress on the Implementation of the Individuals with Disabilities Education Act: Appendix A-33. The percentage of children served is based on U.S. Census Bureau estimated resident population. The data for preschool students with disabilities are reported as of December 1, 1995.)

Early Childhood Direction Centers Network

There are 15 Early Childhood Direction Centers (ECDCs) covering specific geographic regions of the State. Each Direction Center carries out a common core of activities related to information and referral services for families of children with disabilities, birth through age five. Early Childhood Direction Centers:

- Provide families with information regarding various service options in a neutral manner, allowing families to make their own informed decisions about programs and services for their children;
- Assist agencies and professionals identify gaps in services for children with disabilities and coordinate efforts to improve services within communities; and
- Provide follow-up services to families until their children reach school-age (five years), ensuring that all of the children's needs continue to be met.

During 1996-97, over 8,000 parents and professionals received referral assistance from ECDCs in regard to specific children. ECDCs made 30,618 follow-up contacts to parents and professionals and handled more than 42,000 requests for information. (See Section VI, page VI.92 for parent specific information.)

MONITORING

The SED assures that preschool programs are in compliance with federal and State laws and regulations regarding the education of students with disabilities. Regional special education staff monitored programs operated by school districts, BOCES, private day schools and education programs under the jurisdiction of other State agencies for students in their care. Monitoring included on-site evaluations of programs, review of business plans, review of federal grant proposals, and review of applications for approval to serve students with disabilities. During the 1996-97 school year, 47 preschool programs in New York State received on-site program reviews by Education Department personnel. Many additional site visits were made for the purpose of providing technical assistance. It is anticipated that during 1997-98, VESID will develop a Quality Assurance review process for preschool programs similar to that developed for school-age public programs. This new process will be piloted during the 1998-99 school year.

IMPROVING PROGRAM SERVICES AND RESULTS

During 1996-97, SED and VESID continued to implement a strategic plan to raise the level of learning of all New Yorkers, including preschool students with disabilities. Goals and objectives have been established to focus upon key aspects of each program and provide an objective basis for program evaluation and program planning. The specific components of these plans, including a detailed analysis of results to date, are presented in Section VI of this report.

SECTION III

1996 - 1997

PERFORMANCE REPORT

For

STATE GRANT PROGRAM

SECTION 611 IDEA

Prepared for the

UNITED STATES DEPARTMENT
OF EDUCATION

By

THE NEW YORK STATE
EDUCATION DEPARTMENT

III. STATE GRANT PROGRAM, SECTION 611 IDEA

OVERVIEW

New York State guarantees the right to a free, appropriate public education (FAPE) and full educational opportunity in the least restrictive environment to all resident children and youth with disabilities, ages 3 to 21. On December 2, 1996, IDEA Part B special education programs and services were provided to 49,590 students with disabilities, ages 3 to 5, and to 363,198 students with disabilities, ages 6 to 21. (Data are not available regarding the total number of students with disabilities provided special education programs and services during the entire 1996-97 school year.) New York State received an allocation pursuant to the Individuals with Disabilities Education Act (IDEA), Section 611, in the amount of $159,376,867.

COMPREHENSIVE SYSTEM OF PERSONNEL DEVELOPMENT

New York State's Comprehensive System of Personnel Development (CSPD) implements requirements established in the IDEA and in Part 300 of the Code of Federal Regulations. The State's CSPD system is described in Section X of the Final Approved New York State Plan for Education of Students with Disabilities, 1996-98. Major activities to implement the provisions of the CSPD are summarized below.

Preservice Initiatives

The State Education Department (SED) is responsible for coordinating and facilitating efforts among Institutions of Higher Education (IHEs), Local Education Agencies (LEAs), and professional organizations to recruit, prepare and retain qualified personnel. The primary need areas which must be addressed are shortages of teachers for students who are blind or visually impaired; teachers for students who are deaf or hearing impaired; related service providers such as occupational therapists and physical therapists; and bilingual extensions for special education teachers (preschool and school-age), teachers of speech and hearing impaired, speech pathology, school psychology, and counseling. The need to address the issue of highest standard for the credential of teacher of speech and hearing impaired is also a priority.

Major initiatives which are established and supported by SED using federal discretionary funds and designed to address preservice recruitment and capacity building are summarized in this section. However, it is important to note that not all SED activities are summarized by these initiatives. In some cases, SED participation and leadership with various local, regional and State-level planning groups has yielded significant progress without the need for funded support or specific projects. **Please note: In order to clearly indicate project scope, the title of each project listed on the balance of this page to page III.12 will include one of two prefixes. The prefix * indicates projects targeted for school-age special education programs only; the prefix ** indicates projects targeted for both preschool and school-age special education programs. (Projects targeted for preschool special education programs only are presented in Section II of this report.)**

Recruitment and Capacity Building

** Paraprofessional Career Ladder - The Paraprofessional Career Ladder initiative is a distance-learning (telecommunications) program in New York City which is designed to assist paraprofessionals to complete six undergraduate hours of course work required to be certified as Teaching Assistants. The program originally involved four local universities and approximately 250 participants enrolled in courses during 1993-94. It is expected that some participants will use the program as a springboard for further studies leading to certification as a Teacher of Special Education. The training materials developed for this program were disseminated to the Special Education Training and Resource Center (SETRC) network in October 1994 to be appropriately incorporated in statewide in-service training program initiatives. This project was continued at three IHEs during 1995-96 using local funds. This project was also expanded to include two new components during the 1995-96 program year:

> City University of New York (CUNY) Development Project - In order to address a wider audience of paraprofessionals, this component was funded to revise and expand two existing telecourses for paraprofessionals: Introduction to Developmental Disabilities, and Introduction to Special Education. The project also developed a new course entitled "Children and Youth with Emotional Disabilities." During 1996-97 two videotapes on pre-referral strategies and nonbiased assessment for language minority and limited English proficient students were developed and disseminated.
>
> Strengthening the Instructional Team for Special Education for Paraprofessionals and Teachers (Medgar Evers College of the City University of New York) - This project was funded to develop a model curriculum and credit-bearing course to train teams of teachers and paraprofessionals from a variety of kindergarten to grade 12 settings including bilingual education, special education, and Title 1. The program provides career and academic counseling for paraprofessionals and professionals to encourage enrollment in special education programs leading to certification in special education, bilingual special education and other related services shortage areas. During 1996-97 a video segment addressing personnel recruitment was developed to complement the two videos described above.

** Intensive Teacher Institute for Teachers of the Blind/Visually Impaired and Deaf/Hearing Impaired - This initiative began during the 1992-93 program year and has been renewed annually since that time. The Institute provides tuition reimbursement to selected candidates who agree to participate in certification programs for the shortage areas indicated. The program targets approximately 25 students per year on a statewide basis. A service requirement exists to ensure that participants teach in schools which are located in New York State upon completion of the program.

** Intensive Teacher Institutes in Bilingual Special Education - This program provides tuition support to candidates currently working as bilingual teachers, preschool to grade 12, who enroll in programs leading to teacher certification in bilingual special education. This program is targeted toward bilingual special education provider needs in the New York City and surrounding areas. 79 candidates participated in the preschool and school-age components during 1996-97.

A service requirement exists to ensure that participants teach in schools which are located in New York State upon completion of the program.

** Bilingual Speech Pathology University Capacity Program - This program was designed to build university capacity in the area of bilingual speech pathology. In 1995-96, planning grant funds were awarded to seven universities (Long Island University - Brooklyn Campus, Lehman College of the City University of New York, St. John's University, Hofstra University, Adelphi University, Teachers College of Columbia University, and the State University College of Buffalo) to register a bilingual education certification extension on their programs for teachers of the speech and hearing handicapped. During 1996-97, an additional planning grant was awarded to Hunter College.

** Bilingual Special Education Teacher Test Preparation Grant - This program provides intensive test preparation for teacher examinations to candidates for bilingual special education teaching certificates. The program is targeted to New York City area personnel. During 1996-97, 16 teachers participated in this program.

** Bilingual Special Education Personnel Development Center - A four-year grant was awarded to Hunter College and Medgar Evers College of the City University of New York to provide technical assistance to university training programs and prepare technical assistance pertaining to personnel preparation in bilingual special education. The Center hosts semiannual University Leadership Institutes which are attended by university and LEA administrators to discuss issues related to bilingual special education. It is actively involved in collaboratively working with other universities to develop teacher and pupil personnel support training programs which are necessary for registration of bilingual special education certification extension programs. The Center is also responsible for collecting and analyzing statewide supply and demand data relating to bilingual special education personnel.

** Bilingual Speech Pathology Practicum Support - This program was designed to provide additional practicum support for teachers of the speech and hearing handicapped who need to complete requirements associated with licensure as speech pathologists. The program matches funds provided by the New York City Board of Education (up to $5,000 per university/college) to provide supervision at additional practicum sites that universities/colleges would otherwise be unable to provide. The program provided practicum sites for 21 New York City Board of Education participants during the 1995-96 program year at seven sites including Teachers College of Columbia University, Long Island University - Brooklyn Campus, Hofstra University, St. John's University, Hunter College (CUNY), Lehman College (CUNY), and Adelphi University. During 1996-97, 24 teachers participated at the same seven sites.

In-Service Initiatives

Local Planning Requirements

The Education Department continued to implement a local education agency CSPD planning requirement as a condition for receipt of federal flow-through funds. Accordingly, each school district and BOCES is required to conduct an analysis of personnel development needs as related to the educational goals and expected results which it has set. The LEA plan must also identify how the State's CSPD will be accessed to address such goals. This results-based planning process uses personnel development as a planning strategy to bring about measurable results at the local level. A set of recommended procedures for the needs identification and planning process was developed and disseminated to the SETRC network in 1993. A field memorandum announcing the procedures and requiring LEA CSPD Plans in conjunction with the 1994 LEA Application schedule was disseminated in January 1994. LEAs first implemented the new planning procedures for their September 1, 1994 application submission for federal flow-through funds, and updated their plans for the September 1995 submission. The procedure for local planning was modified during 1995-96 to include evaluation strategies that link personnel development efforts with student results at the local level. The evaluation procedure was based on an extensive review of research regarding effective personnel development procedures. High success indicators of successful personnel development practices were incorporated into a self-evaluation matrix that is completed by LEAs as part of their CSPD planning process (see Section VI). The outcomes of the self-evaluation are reported to SED by the SETRC and Administrators Leadership Training Academy (ALTA) networks. The SETRC and ALTA networks then tailor their local program offerings to assist school district personnel achieve specific student-centered results.

SED uses a variety of external and internal resources for providing in-service personnel development and training, technical assistance, and information dissemination. Major funded programs are briefly summarized below.

* Special Education Training and Resource Centers (SETRCs) - The 42 SETRC programs provided training, technical assistance, and information dissemination on a wide variety of topics to general and special educators, parents, related service providers and others involved with special education. The SETRC network is the major SED-funded program which supports the provision of training to local providers and parents groups. Training is provided in a manner consistent with local CSPD Plans and in response to State initiatives. During the 1996-97 program year, over 46,300 hours of training were provided to approximately 269,500 participants. Approximately 807,000 items of written information were disseminated. The target populations and major topics of training are summarized in Section VI.

* Special Education Training and Resource Center Bilingual Special Education Collaborative - As the result of increasing needs in the area of bilingual special education, SED established a secondary network of bilingual special education trainers and technical assistance personnel to plan and deliver personnel development services for language minority and limited English proficient persons with disabilities. Membership includes bilingual special education trainers from SETRCs in the City School Districts of New York City, Buffalo, Rochester, Syracuse, and Yonkers; staff from the Bilingual Special Education Personnel Development Center at Hunter College, Bilingual Special Education Intensive Teacher Institute, and Northeast Regional Resource Center in Vermont. In 1996-97, the collaborative developed a materials resource directory and a comprehensive calendar of national and State activities in bilingual special education. The network was also expanded to provide a full time equivalent bilingual SETRC trainer to serve the upstate region.

** Administrators Leadership Training Academy (ALTA) - The ALTA network of eight programs throughout the State provided training, conferences, and presentations for general and special education leadership personnel on current issues associated with special education. Each ALTA project was directed by a Program Advisory Committee (PAC), including representation by SETRC. During 1996-97, approximately 1,700 hours of training were provided to approximately 18,600 participants. The target populations and major topics are summarized in Section VI.

** Partnership of Parents and Professionals (POPP) - The POPP project is implemented by the Erie 2-Chautauqua-Cattaraugus Board of Cooperative Educational Services (BOCES) in collaboration with the Parent Network of New York. The purpose of the project is to provide training to parents of children with disabilities who are, or are expected to be, members of the Committee on Special Education (CSE) and/or Committee on Preschool Special Education (CPSE) so that they will be full and effective participants in the educational decision-making process. During 1996-97, turnkey training was provided in three regional areas of New York State, to 66 participants. In addition, a statewide database containing the names and addresses of parents of children with disabilities was developed so a comprehensive mailing list would be available to SED for information dissemination purposes. A follow-up questionnaire was developed and sent to past POPP participants to determine the amount and type of POPP turnkey training occurring in local districts and to determine how the POPP project could facilitate local training throughout the State.

** New York City Parent Centers – Three New York City Parent Centers were established during 1996-97. During the initial year of operation, the Centers conducted a wide variety of parent and professional training sessions, provided a range of parent services, conducted extensive information dissemination and outreach to parents and professionals, and established and promoted linkages with an array of metropolitan area programs and services.

** Technology Resources for Education (TRE) Program - TRE is a statewide program funded by SED and implemented at the Albany-Schoharie-Schenectady-Saratoga BOCES. The program provides training and technical assistance to school district personnel on the appropriate evaluation, selection, and use of assistive technology devices and services. In 1996-97, the program provided 73 workshops for approximately 1,820 people. The program also responded to over 337 requests for information, referrals and technical assistance. TRE staff work extensively with other groups such as Technology Related Assistance for Individuals with Disabilities (TRAID) Centers which are federally supported. TRE is an integral part of New York State's CSPD strategy and works directly with the SETRC and ALTA programs throughout the State.

** Part 200 Management System Support Network at Regional Computer Centers (RCCs) and Regional Information Centers (RICs) - The Part 200 Management System is a computerized information management system designed to assist with special education administrative and information processing functions. The system is being used by approximately 250 school districts and agencies. The RIC/RCC networks provide training, technical assistance, documentation and support to people involved with the system.

Other Personnel Development Initiatives

** Special Education Mediation - 1996-97 was the second year in which all school districts were required to offer mediation as an alternative to more formal due process proceedings. In New York City, 179 mediations were conducted (five mediations were conducted during 1995-96). In all other State regions, 77 mediations were conducted (116 mediations were conducted during 1995-96). Given the decrease in the number of mediations requested outside New York City, strategies were implemented to promote the use of this due process option. Statistical information regarding special education mediations statewide during 1996-97 are presented in Section VI.

* School-to-Work Program (STW) - The School-to-Work Opportunity Act (SWOA) and the Individuals with Disabilities Education Act (IDEA) stress the need for higher standards and skills for all students to prepare them to live, learn and work in the community as adults. New York State is in year four of a federally funded systems change grant that provides staff and curriculum development monies to enable partnerships to develop school-based, work-based and connecting (e.g., counseling) activities locally. Fifty local partnerships have been funded and are providing school-to-work activities in 80% of the school districts statewide. The Offices of Workforce Preparation and Continuing Education and VESID worked closely to ensure that students with disabilities are included in all STW activities.

* Transition Coordination Sites (TCS) – Initially established under the federal grant program for State Systems for Transition Services for Youth with Disabilities, eight regional Transition Coordination Sites in New York State assist local communities to implement transition planning and services. The primary objectives of TCSs are to coordinate existing resources within the geographical area of each Site in order to provide information, training and technical assistance to local school districts, families, students and community agencies in their implementation of transition planning and their delivery of transition services. This includes providing local leadership and promoting partnerships among local and community services to assist students with disabilities to move smoothly from secondary education level programs to postsecondary educational opportunities, adult vocational rehabilitation services and/or employment. Activities include training conferences, individual technical assistance and problem solving, practical guidelines and community resource referrals. Sites also assist community programs and schools to develop or replicate effective models of practice. Since the inception of the TCSs in 1992-93, more than 100,000 individuals have been served, including students, parents, school personnel, postsecondary education personnel, employers and adult agency personnel; and more than 215,000 documents have been developed and shared with this audience.

During 1997, the Sites coordinated Post School Indicators surveys of 1,453 former special education and 391 former general education students who had exited secondary education programs. The results of the survey will be published separately.

* Test Access and Modification Procedures - During 1996-97, SED outlined a long range plan for the enhancement of educational expectations and results for all students. Corresponding with such initiatives, VESID developed and broadly disseminated the publication, Test Access and Modification for Individuals with Disabilities. This comprehensive document will help ensure that students with disabilities are afforded full appropriate access to local, State and national testing programs, and are consistently provided with necessary accommodations to permit an equitable

opportunity to demonstrate knowledge and abilities. In response to numerous requests from educators and parents, VESID staff conducted 42 regional presentations for approximately 4,900 participants.

** Special Education Data Collection and Analysis - During 1996-97, VESID staff conducted 17 regional training programs regarding special education data collection and analysis for approximately 730 participants. Such presentations provide the opportunity to discuss and clarify data collection forms and procedures; national, State and regional trends and characteristics; and strategies to disseminate such information. Conducted since 1992-93, these training programs have improved the validity and reliability of data and promote the use of such information for program evaluation and goal setting at the local level.

* Special Educator Support Program (SESP) - This United Federation of Teachers project received discretionary funding through the Individuals with Disabilities Education Act (IDEA) to provide services to selected Schools Under Registration Review (SURR) in New York City. During the 1996-1997 school year, SESP worked directly with eight SURR schools to assist them in implementing school improvement plans. SESP personnel offer intensive staff development and on-site support to general education and special education teachers focused on improving instructional services to students with disabilities. They also foster increased linkages between general education and special education programs, curriculum and instructional methodologies.

** Independent Living Centers - The network of 35 Independent Living Centers (ILCs) provided a wide array of services to youth with disabilities, parents, schools, medical and health professionals and the business community. ILCs assisted students with disabilities and families in understanding laws and rights pertaining to education, supported the development of self-advocacy skills to enhance participation in educational and transition planning, provided peer mentors for youth to gain experience and strategies in living with disabilities and assisted students and families in advocating for appropriate services.

* Passport to the World of the Performing Arts - This New York City project, implemented in cooperation with Lincoln Center for the Performing Arts, provided cultural arts opportunities and educational support materials to approximately 150 students with disabilities and their teachers and families in New York City. During 1996-97, more opportunities were offered for interactive sessions with guest artists and in-depth study of particular performing arts.

LEAST RESTRICTIVE ENVIRONMENT (LRE) INITIATIVES

**NY Partnership for Statewide Systems Change 2000 Update

During 1996-97, the Systems Change Project implemented the third year of a five-year federally funded grant. The purpose of the grant is to develop quality inclusive programs for students with significant disabilities in their home schools and communities. The grant activities are directed at three areas: students with emotional disabilities in the primary grades who are likely to be referred to more restrictive settings; students who are in high schools; and preservice and in-service programs that prepare teachers to work with learners who have diverse educational characteristics in general education classes and schools.

The project provides technical assistance to selected school districts under the direction of Syracuse University. Syracuse University is a partner in the Systems Change Project and works closely with SED in developing quality inclusive programming throughout the State.

Some of the Project's highlights include the participation of a range of school districts, in large urban settings (such as New York City and Buffalo) and in small rural settings (such as Mount Morris), serving students with emotional disabilities. The project continues to have positive results in supporting schools to make appropriate changes in instruction and in developing curricula modifications for the productive participation of students with disabilities in general education.

The preservice component of the Project includes 24 colleges and universities. Each college made a commitment to either change or develop a program that prepares new teachers to work in inclusive settings and with diverse learners. Many of the programs combine elementary and special education teacher preparation at the baccalaureate or at the master's degree level.

The in-service initiative is highlighted by the annual "Special Education Training and Resource Center Summer Institute". The goal of the Institute is to share Systems Change Project materials with training network staff so that by the end of the Project, in August 2000, every school district in the State will have access to all "Best Practice" materials.

The Project convenes the annual "Inclusive Schools and Communities for Children and Youth Conference" which consistently attracts over 1,000 participants. In addition, the Project develops instructional materials and other staff development resources related to inclusive "best practices." These materials are now available over the Internet on the Systems Change Project website maintained by Syracuse University. The address is <http://soeweb.syr.edu/systemschange/>.

EDUCATIONAL STANDARDS FOR STUDENTS WITH SEVERE DISABILITIES

The Learning Standards and Alternate Performance Indicators for Students with Severe Disabilities

A committee of more than 40 parents and representatives of public and private schools and other key groups and organizations developed alternate performance indicators and sample tasks linked to the standards for students with severe disabilities. These alternate performance indicators and sample tasks reflect appropriate educational outcomes for students with severe disabilities and will assist school personnel and families in understanding what students with severe disabilities need to know to attain high standards.

Public meetings were conducted throughout New York State in the fall of 1997 to receive comments on the draft alternate performance indicators and sample tasks. In February 1998, the Board of Regents approved the final document.

An Alternate Assessment System

Students with severe disabilities have traditionally been exempted from the State assessment program. In order to link student performance with individualized education programs (IEPs) and high educational standards, an alternate assessment system will be designed and implemented for these students. The Individuals with Disabilities Education Act (IDEA) Amendments of 1997 require states to implement an alternate assessment system by the year 2000. SED will engage the best thinkers in the field to develop an alternate assessment system that will allow students with the most significant disabilities to demonstrate their mastery of skills and attainment of knowledge.

SPECIAL EDUCATION FINANCE REFORM

The Board of Regents 1996-97 State Aid Proposal was designed to strengthen and expand the provision of services to general education students, support students returning from special to general education and ensure that students, both with and without disabilities, share in the availability of resources and services they need for a high quality education. In addition, the proposal called for creating a special education funding system that breaks the connection between (1) special education funding and (2) location and level of service provided.

It is expected that, as a result of funding reform, students will receive needed services, regardless of whether the student is classified due to a disability. It is also projected that school districts will have resources available to develop and implement integrated opportunities for students with disabilities, and that fewer students will require special education due to increased flexibility in allocating resources.

Although the State Legislature did not implement the Regents proposal to establish a new special education funding system, action was taken to increase State support for educationally related support services as well as declassified support services.

PROMOTING INTERAGENCY COLLABORATION

To establish a framework and support for interagency collaboration at the State and local levels, SED has undertaken and continued a number of initiatives with the goals of improving educational results; improving access to a broad range of needed services; supporting the meaningful involvement of families in the education process; enhancing transition services; and creating flexibility in the expenditure of existing resources within each community. The following examples of State initiatives were implemented in order to achieve these goals.

**Partners for Children

Partners for Children is a formal agreement that joins the private sector with public health, human services and education systems to ensure that all children have an equal opportunity to reach their full potential. State agency members include the Board of Regents/State Education Department, Department of Health, and Offices of Mental Health, Children and Family Services, and Temporary and Disability Assistance. Private organization members are the United Way of New York State, the New York State Schools Boards Association, New York State United Teachers, New York State Association of Counties and New York State Association of County

Health Officials. This statewide collaborative initiative focuses on providing long-term leadership to communities in order to:

- Assist children in being ready for school and increase their likelihood of being successful in school;
- Increase local partnerships among parents, community-based organizations and educators in addressing children's needs together; and
- Increase public awareness about the needs of young children and their families.

**Task Force on School and Community Collaboration

The Task Force on School and Community Collaboration is designed to assist schools and State and local agencies providing social, health, mental health, and related family and children services in working together to support children and families. The Task Force promotes the well being of children through State support for local partnerships between schools and communities. Prevention and youth development programs are encouraged as ways of helping children grow in a healthy and nurturing environment to be successful in school and in life.

During the 1996-97 school year, Partners for Children and the Task Force on School and Community Collaboration were involved in a number of activities across the State designed to support and expand the development of school-community partnerships. These efforts included:

- Conducting local community building activities such as the May 1, 1997 Partners for Children teleconference: "Promoting School Success Through Community Partnerships;"
- Providing technical assistance in helping local partners achieve goals;
- Assisting communities to identify and overcome barriers related to State funding restrictions, regulatory requirements, and administrative procedures;
- Sharing information on models of school-community collaboration; and
- Developing an outcomes tool to assist communities in measuring progress.

**Coordinated Children's Services Initiative (CCSI)

The Coordinated Children's Services Initiative is a multi-agency initiative, started in 1993, to assist localities in creating a local structure that provides children with emotional and behavioral disabilities who are at risk of residential placements with services in their homes, schools and communities. The goal of this structure is to improve local decision making so that services are coordinated and families are supported in staying together. Through coordinated community services and the use of flexible funds, the county's human service structure is able to provide individualized, flexible, effective and cost efficient services. Using a family-focused, strengthsbased approach, these efforts have proven to be successful in providing necessary interventions for the child and family in a collaborative manner.

There have been three phases of CCSI funding since 1993. During the 1996-97 program year, 15 new counties were added, bringing the total number of CCSI collaborations to 32. In 1996, the original nine CCSI counties reported they had redirected almost $28 million by preventing residential placements for approximately 600 children.

These interagency initiatives support communities and school districts in meeting the needs of children, including children with disabilities who need a high level of support to actively participate in their homes, schools and communities.

QUALITY ASSURANCE MONITORING

SED conducts formal site reviews of agencies providing educational programs and services to children and youth with disabilities to determine whether current practices are in compliance with federal and State laws and regulations. As described below (see "Monitoring Initiatives"), SED's monitoring system is evolving into a Quality Assurance System; refinement of the new system continued during 1996-97. All school district reviews conducted during that year were in accordance with the new Quality Assurance protocols (approximately 40 public and nonpublic programs were formally reviewed). Program monitoring personnel from VESID's five regional offices also conducted technical assistance site visits to several hundred school districts, BOCES, approved private schools and other special education programs.

Monitoring Initiatives

In 1994-95, VESID staff developed a Quality Assurance Plan which had two essential elements: a procedural shift in the monitoring process from reliance on staff site reviews to a system which is based on collaborative review with verification; and a philosophical shift in monitoring priorities emphasizing the attainment of positive results for students with disabilities over procedural compliance. This collaborative review process was piloted in New York State in six public school districts, including one in New York City, during 1995-96. During the second year of the pilot, more than 80 school districts participated in a Quality Assurance collaborative review, including five in New York City.

This process is comprised of school district key performance indicator data (as depicted in Section VI of this report) and formal surveys of parents and special education and general education administrative and instructional personnel. A protocol for the review of programmatic and compliance issues related to one of five major areas required by federal and State laws and regulations (individualized education programs) was developed and implemented in 1995-96. During 1996-97, an additional protocol was developed to review programmatic and compliance issues related to Free Appropriate Public Education (FAPE)/Least Restrictive Environment (LRE). The IEP and FAPE/LRE protocols provided for three of the six major areas required by federal and State laws and regulations. It is anticipated that during 1997-98, the remaining areas of Due Process, Evaluations and Facilities will be developed. The responses from school districts participating in the Quality Assurance Plan continued to be very positive.

Although collaborative reviews are currently designed for school districts only, the long-range Quality Assurance Plan calls for the development of similar review protocols for the other public and nonpublic special education programs subject to review by the New York State Education Department. It is expected that a Quality Assurance process for preschool programs will be developed during 1997-98 and piloted during the 1998-99 school year. Additional plans for 1997-98 include the initiation of a three tier review system which would enable VESID to identify districts most in need of intensive technical assistance and support (Facilitated Review school districts), those ready to initiate a Quality Assurance review, and those with successful key performance data (Verification Review districts). VESID personnel and fiscal resources will be targeted at those school districts whose data indicate the greatest need.

IMPROVING PROGRAM SERVICES AND RESULTS

During 1996-97, SED and VESID developed complementary strategic plans to raise the level of learning of all New Yorkers, including school-aged students with disabilities. Goals and objectives have been established to focus upon key aspects of each program and provide an objective basis for program evaluation and program planning. The specific components of these plans, including a detailed analysis of results to date, are presented in Section VI of this report.

SECTION IV

1996 - 1997

PERFORMANCE REPORT

For

STATE AGENCY AND STATE OPERATED/SUPPORTED PROGRAMS

VESID

Prepared for the

UNITED STATES DEPARTMENT OF EDUCATION

By

THE NEW YORK STATE EDUCATION DEPARTMENT

IV. STATE AGENCY AND STATE-OPERATED AND/OR STATE-SUPPORTED SCHOOLS

STATE-OPERATED/SUPPORTED PROGRAMS OVERVIEW

During the 1996-97 school year, on December 2, 1996 there were 3,449 school-aged students with disabilities and 287 preschool students with disabilities receiving special education services in 17 State-operated and/or State-supported school programs. A three year summary of the number of students with disabilities served in such programs follows:

Name of Program	Count of Students					
	12/1/94		12/1/95		12/2/96	
	Preschool	School-Age	Preschool	School-Age	Preschool	School-Age
STATE-OPERATED PROGRAMS						
New York State School for the Blind		69		74		69
New York State School for the Deaf		111	6	111		107
New York State Department of Correctional Services		122		47		134
New York State Office of Children and Family Services (formerly known as Division for Youth)		724		902		883
New York State Office of Mental Health		658		600		557
New York State Office of Mental Retardation and Developmental Disabilities		51	2	26		31
STATE-SUPPORTED SCHOOLS (4201 SCHOOLS)						
Cleary School for the Deaf	14	66	12	60	9	67
Henry Viscardi School		225	17	220	12	213
Lavalle School for the Blind		96	6	93	1	83
Lexington School for the Deaf		379	28	401	27	383
Mill Neck Manor School for Deaf Children	53	73	63	78	72	89
New York Institute for Special Education	135	155	137	151	108	153
New York School for the Deaf	13	165	8	160	2	149
Rochester School for the Deaf		152	17	147	10	146
St. Francis DeSales School for the Deaf		191	18	165	11	156
St. Joseph's School for the Deaf		136	23	108	18	115
St. Mary's School for the Deaf		131	10	115	17	114
TOTAL	215	3,504	347	3,458	287	3,449

Note: Not all of the above schools operated approved preschool special education programs. Therefore, counts of preschool students with disabilities are not indicated for all schools.

The following sections provide descriptions of the State-operated and/or State-supported schools' educational programs, as well as performance data which depict the educational accomplishments of students with disabilities enrolled in these programs during the 1996-97 report period. Interpretations of data contained in this section should be made with an understanding of the complexity and severity of students' disabilities, the average length of stay, the limited number of students tested and the primary function of the various State agencies.

NEW YORK STATE OPERATED SCHOOL FOR THE BLIND AND NEW YORK STATE OPERATED SCHOOL FOR THE DEAF

These two schools are operated directly by the New York State Education Department (SED) and are governed by Articles 85, 87, 88 and 89 of the Education Law. Students are appointed to these schools by the Commissioner of Education, based on recommendations of the State-operated school's Multidisciplinary Team (MDT). The school district of residence for each student is also involved in all deliberations of the MDT. Both schools offer day and residential programs to students ages 5 to 21. At the NYS School for the Blind, only students whose educational, physical and/or management needs require the most intensive adult-to-student ratio are served. The NYS School for the Deaf provides services to students with more diverse needs, ranging from moderate to intensive.

During the 1996-97 school year, five students left the NYS School for the Blind, after earning Individualized Education Program (IEP) Diplomas. Six students left the NYS School for the Deaf; four students earned local high school diplomas and two students earned IEP diplomas.

At the NYS School for the Blind, all students were exempted from taking State examinations. The NYS School for the Deaf reported the following results on selected State assessments:

Assessment	Number Tested	Number Exempted	Number and Percent Scoring Above the Statewide Reference Point or Passing
Grade 3 PEP* Reading	11	3	4 (36%)
Grade 3 PEP Math	11	3	8 (73%)
Grade 5 PEP Writing	8	2	6 (75%)
Grade 6 PEP Reading	7	3	0 (0%)
Grade 6 PEP Math	7	3	7 (100%)
Regents Competency Test In Reading	4		3 (75%)
Regents Competency Test In Writing	4		2 (50%)
Regents Competency Test In Mathematics	3		3 (100%)
Regents Examinations (4 different examinations)	14		7 (50%)

*PEP is an abbreviation for the Pupil Evaluation Program test of the State Education Department.

NEW YORK STATE DEPARTMENT OF CORRECTIONAL SERVICES

This section contains information from the New York State Department of Correctional Services' (DOCS) Annual Report of the Academic and Vocational Education Program. The two primary goals of the DOCS education program offered to inmates at correctional institutions are to ensure that every inmate who leaves the system possesses a High School Diploma or High School Equivalency (HSE) Diploma and has the skills needed to obtain employment. All inmates are provided educational services until they reach the eighth grade reading level, and then are encouraged to prepare for the General Educational Development (GED) test in order to earn a HSE diploma. Upon attaining a fifth grade reading level, inmates are eligible to take vocational training, which was provided in 34 different trade areas in 1996-97.

The educational programs consisting of Adult Basic Education (ABE) and GED test preparation are provided in English and Spanish. Instruction in English as a second language is also provided for non-English speaking inmates. Special education and Title 1 remedial education are provided for inmates who are under 21 years of age.

The New York State Department of Correctional Services ensures access to special education for all inmates who are under 21 years of age, regardless of the facility in which they are placed. A plan was implemented during the 1996-97 fiscal year to comply with federal and State laws and regulations related to the provision of appropriate education programs for individuals under 21 years of age who do not possess a high school diploma. DOCS designated 15 facilities to provide special education services. All but one facility has a Committee on Special Education (CSE) to assess, identify, and make specific program recommendations for inmates under age 21 who are determined to have one or more educational disabilities which preclude their ability to benefit from the general education program. A psychologist is appointed to be chairperson of the CSE, which also includes teachers and other professionals in its membership. Special education program placement includes a wide range of offerings which conform with the Least Restrictive Environment (LRE) model. Such services range from a Special Education Cell Study Program to the Consultant Teacher Model.

Inmates reviewed by the CSE may be recommended for facility special education classes taught by certified special education teachers. Special class programs have a reduced ratio of 12 students per teacher. The resource room registration does not exceed 25, with a maximum of 5 students during each class period. In addition to special education classes, students are provided psychological and educational counseling, related services and vocational programs, consistent with each inmate's Individualized Education Program (IEP).

On December 2, 1996, there were 4,446 inmates under age 21 incarcerated in DOCS facilities. Nine hundred sixty-seven inmates were found to be reading below the fifth grade level, and 527 were designated with the extended classification of code "40"[1] at the Reception Centers. Three hundred sixty three inmates identified with code "40" were residing at the 15 designated facilities. Of this number, 134 were receiving special education services. Over the course of the year there were 576 inmates enrolled in special education programs.

The Department of Correctional Services was not able to provide data regarding the manner in which students with disabilities exit special education nor any State assessment results. It is working toward developing systems that will enable such reporting in the future.

NEW YORK STATE OFFICE OF CHILDREN AND FAMILY SERVICES (OCFS)

Through a statewide reorganization of some State agencies, the Division for Youth (DFY) was merged into a new agency entitled Office of Children and Family Services (OCFS). Youth who are incarcerated are placed in facilities operated by OCFS through the court system. The paragraphs below describe the educational services available to youth through the age of 21.

On December 2, 1996, OCFS served 927 youth with disabilities (over 1,800 students with disabilities were served during the course of the entire 1996-97 school year). Students with disabilities constituted approximately 43 percent of the total population of students, ages 10 to 21, served in OCFS facilities. OCFS operated 34 on-site school programs; special education services were provided in 30 facilities. There were 41 special education teachers providing special class, resource room and/or consultant teacher services.

Students with disabilities are provided special education services based on recommendations made by the CSE of each facility. Special education services are provided by certified staff and in accordance with Part 200 of the Commissioner's Regulations. Consultant teachers provide direct and indirect services to students with disabilities enrolled in the general education programs. Students in resource room programs and special class programs follow the same curriculum as the general education students, enabling students to be integrated into appropriate general education activities and subjects.

---

[1] Code "40" is an extended classification designation for inmates under 21 years of age who test below the fifth grade level in reading or mathematics, or scored below 70 on the BETA-II, or had been at one time enrolled in a special education program

The following OCFS educational program objectives are carried out in each facility to teach students the academic and vocational skills that are necessary for successful re-entry into the community:

- Provide basic skills instruction in reading, mathematics and language arts;
- Provide comparable and equivalent educational services specified in Part 116 of the Regulations of the Commissioner;
- Provide opportunity to learn technical and life skills needed for work;
- Provide pre-employment skills training and support services;
- Provide required special education services specified in student IEPs; and
- Provide age-appropriate leisure-time activities to enable students to acquire skills, positive behaviors and attitudes through physical education and recreation.

Several initiatives beyond the basic educational programs are helping students succeed in the HSE and the Regents Competency Test (RCT) Preparation Programs. Other continuing activities, such as collaboration with local education agencies and SED, are assisting students to make a smooth transition to public schools after their relatively brief (six to 24 months average) stay in OCFS facilities. Steps are also being taken to strengthen student access to academic and employment services in the community, and to develop networks to advocate on behalf of OCFS youth.

Performance data on State assessment measures for 1996-97 are summarized below for all students. (Approximately 43 percent are students with disabilities.) The total number of students tested in 1996-97 is significantly less than the previous year, due to at least one facility being downsized. Data are not available (disaggregated) for students with disabilities.

- Of 182 students tested, 55% passed the RCT in writing.
- Of 210 students tested, 65% passed the RCT in reading.
- Of 281 students tested, 40% passed the RCT in mathematics.
- 68 youth (or 50% of students who took the GED test) passed.

Exiting data for students with disabilities for the 1996-97 school year were reported as follows:

- 4 students with disabilities earned high school equivalency diplomas.
- 41 students with disabilities were declassified and returned to general education.
- 584 students with disabilities were discharged from OCFS facilities (reported as moved). Of these, 377 were known to be continuing in other educational programs.

NEW YORK STATE OFFICE OF MENTAL HEALTH

The Office of Mental Health (OMH) provides inpatient facility education programs in psychiatric centers statewide for children and adolescents between the ages of 5 and 21 who are diagnosed with serious emotional disturbance. These programs are operated in six children psychiatric centers, six children and youth units located within adult psychiatric centers, and 14 adult facilities in which students between the ages of 18 and 21 reside.

Students receive mental health services at the facility intermediate level of care under the auspices of OMH. All children and youth with inpatient status have a DSM – IV diagnosis, which indicates they exhibit functional impairments in the domain of inappropriate behaviors and feelings which, in most cases, adversely affect their educational performance. Consequently, educators who operate the programs are uniquely challenged to simultaneously meet student mental health and academic needs. The primary goal of OMH is to transition students to less restrictive and more appropriate educational environments, such as their home school.

Students are administered the State assessments with consideration of two factors: the length of stay (varies for each student), and the individual mental health needs and behaviors exhibited by the students at time of assessment. State assessments may be administered by the student's school district of origin, and upon request, copies of the State assessments are forwarded to the inpatient education program administrators for consideration in the development of educational goals. It is noteworthy that over the past year, there has been increased student participation in such assessments; consistent with the reauthorized Individuals with Disabilities Education Act (IDEA), OMH will more intensively ensure that all students are provided the opportunity to participate in the State assessments, with the provision of test modifications when appropriate.

In 1996-97, the following State assessment results were reported by OMH psychiatric facilities:

Test	Number Tested	Number Exempted	Number and Percent Above the Statewide Reference Point or Passing
Grade 3 Reading PEP	5	0	3 (60%)
Grade 3 Math PEP	7	0	4 (57%)
Grade 5 Writing PEP	1	0	1 (100%)
Grade 6 Reading PEP	5	0	2 (40%)
Grade 6 Math PEP	4	1	2 (50%)
RCT Reading	9		3 (33%)
RCT Writing	10		5 (50%)
RCT Math	28		13 (46%)
All Regents Examinations (Combined Total)	20		8 (40%)

During the 1996-97 school year, 318 students left in the following ways, after receiving special education services from OMH: 1 received a local high school diploma; 2 received HSE diplomas; 10 received IEP diplomas; 17 were declassified and returned to their home districts; 10 reached maximum age for educational services; 205 students moved and were known to be continuing in other educational programs; 72 students moved, and were not known to be continuing; and 1 student dropped out of school.

NEW YORK STATE OFFICE OF MENTAL RETARDATION AND DEVELOPMENTAL DISABILITIES

In 1978, approximately 100,000 people in New York State were thought to have mental retardation and 17,000 of these individuals were living in institutions. A new agency, the Office of Mental Retardation and Developmental Disabilities (OMRDD) was formed. Its charge was to design and carry-out a service delivery system that would permit the closing of such institutions and, instead, provide appropriate services in the community for the formerly institutionalized residents.

OMRDD has made it possible for most of the institutionalized individuals to be moved to homes and programs in the community. The few children and adults remaining in the institutions are currently unable to function in community settings. It is planned that they too will have a place in the community and there will cease to be institutions for individuals with developmental disabilities.

During the 1996-97 school year, 31 school-aged children lived in OMRDD operated facilities and received special education services. Children served by this agency in this manner are severely developmentally delayed, have severe medical conditions and/or exhibit behaviors that make it inappropriate for them to receive educational services in the public school setting.

Due to the severity of their disabilities, these children are exempt from participation in the State assessment program. Instead, local alternate assessment instruments for nongraded individuals with disabilities are administered. Primarily, the Comprehensive Functional Assessment (CFA) is used to measure student progress toward educational goals. The CFA monitors progress in the areas of independent living, communication, cognitive ability, sensory motor development, social development, affective behavior, physical development and health. This assessment is used to generate a comprehensive list of strengths and needs from which an IEP is developed. Data are collected daily and summarized monthly. When short-term objectives are not achieved within a specified period of time, the short-term objectives are revised to indicate more appropriate expectations. Quarterly reviews and annual reassessments are also completed as formal methods to monitor student educational progress.

During the 1996-97 school year, 10 students left OMRDD special education programs. One of these students was known to be continuing his education in another program; and one student moved, and was not known to be continuing in another educational program. Seven students reached 21 years of age and were no longer eligible for special educational services. One student passed away.

STATE-SUPPORTED SCHOOLS

There are eleven "4201 Schools" listed on page IV.1. On December 2, 1996, they served 1,668 school-aged students with disabilities and 287 preschool students with disabilities. These schools were established and are governed by Articles 85, 87, 88 and 89 of the Education Law. Appointment to these schools is made by the Commissioner of Education based on recommendation of the resident school district CSE. These schools are privately operated but publicly funded. Eight schools provided services to students who are deaf and deaf with other disabilities (i.e., deaf with multiple disabilities, deaf with autism or deaf with emotional disturbance). Two schools provided services to students who are blind, visually impaired or blind with multiple disabilities. N.Y. Institute for Special Education provided programs for students disabled due to blindness, as well as for students with serious emotional disturbances, ages 5 to 13. The Henry Viscardi School provided services to students with orthopedic impairments, other health impairments, multiple disabilities or traumatic brain injury. All eleven schools operated day programs; five also operated residential components. All eleven schools operated approved preschool special education programs.

The tables on pages IV.7 and IV.8 present data regarding the participation and performance of students with disabilities attending 4201 schools in the State testing program, and the manner in which 156 students exited their special education program during 1996-97.

PARTICIPATION AND PERFORMANCE IN STATE TESTING PROGRAM
STATE SUPPORTED SCHOOLS (1996-97)

T = Number Tested E = Number Exempted % = Percent Scoring Above the Statewide Reference Point or Percent Passing

School	Grade 3 PEP Reading			Grade 3 PEP Math			Grade 5 PEP Writing			Grade 6 PEP Reading			Grade 6 PEP Math			RCT Reading		RCT Writing		RCT Math		Regents Examinations All Subjects Combined	
	T	E	%	T	E	%	T	E	%	T	E	%	T	E	%	T	%	T	%	T	%	T	%
Cleary School for the Deaf	2	3	0	2	3	0	5	0	20	3	1	0	3	1	0	3	100	3	100	3	33	23	78

Lavalle School for the Blind	2	0	100	2	0	50	4	0	100	6	0	67	6	0	100	4	75	5	60	5	20	0	0
Lexington School for the Deaf	13	0	0	13	0	15	13	0	46	8	0	0	8	0	63	53	26	64	17	130	5	49	37
Mill Neck Manor School for Deaf Children	4	0	0	3	0	33	6	0	50	0		0	0		0	1	100	0	0	6	100	4	75
NY Institute for Special Education	11	0	55	11	0	82	23	0	74	17	0	82	17		47	4	100	4	100	5	60	4	25
NY School for the Deaf	3	3	0	3	3	67	0	2	0	4	0	0	4	0	75	9	67	10	40	23	57	4	100
Rochester School for the Deaf	5	0	20	5	0	100	6	0	67	5	0	20	5	0	80	5	40	6	83	14	50	31	55
St. Francis DeSales School for the Deaf	10	1	10	10	1	30	19	1	58	16	1	0	16	1	44	No high school program							
St. Joseph's School for the Deaf	13	0	0	13	0	8	11	4	27	9	0	0	9	0	78	No high school program							
St. Mary's School for the Deaf	5	4	20	5	4	100	4	4	100	11	0	9	11	0	55	5	20	0	0	9	78	21	81

The above data were reported by all eleven 4201 schools listed in page IV.1. For these students, performance in the State testing program must be interpreted with an understanding of the nature of their disabilities and the rate at which they acquire language skills. One school for the deaf reported the following observation: "Typically our elementary students do not gain reading skills at the same rate as other elementary school children, but usually by age 14, most students are able to demonstrate competency on the RCTs and Regents examinations."

There are many other measures that demonstrate individual student achievements and program accountability. For example, New York Institute for Special Education reported data indicating a high level of parent satisfaction with many aspects of the school's operating procedures and results. It also provided five year post-graduation data demonstrating positive results in the numbers and percentages of students continuing their education in college, entering vocational training programs or other day treatment programs, or being employed. An additional measure of program effectiveness reported by this school was the number of students who transitioned to less restrictive settings after leaving the program at age 13. It is anticipated that in future years, more schools will develop data/information systems to fully and accurately reflect the quality of services provided to students.

SECTION V

1996 - 1997

PERFORMANCE REPORT

For

VOCATIONAL REHABILITATION PROGRAM

VESID

Prepared for the

UNITED STATES DEPARTMENT

OF EDUCATION

By

THE NEW YORK STATE

EDUCATION DEPARTMENT

V. Vocational Rehabilitation Program

OVERVIEW

The State Education Department (SED), Office of Vocational and Educational Services for Individuals with Disabilities (VESID) is the lead agency responsible for ensuring the appropriate provision of vocational rehabilitation (VR) services to eligible people with disabilities. VESID's orientation and philosophy presumes that all persons with disabilities can benefit from vocational rehabilitation services and should have opportunities to work in competitive jobs, in integrated work settings[1] within their communities. Vocational rehabilitation counselors guide individuals through the service programs they need in order to reach their employment goals. Services may include vocational assessment, vocational counseling, assistance with transition from school to the world of work, job training and placement, job follow up, and other services to support the individual's employment objectives. VESID ensures that both the individual and the employer are satisfied with the placement and will intervene if problems occur after an individual has been placed in a job. In providing these services, VESID works with the business community, as well as with an extensive vocational rehabilitation provider system, other agencies, labor organizations and schools. During Federal Fiscal Year 1996-97 (FFY 1996-97), 46,177 individuals were referred for vocational rehabilitation services, and a total of 114,759 individuals were provided such services. New York State received an allocation pursuant to the Vocational Rehabilitation Act in the amount of $97,213,815. The State also received an allocation, pursuant to Title VI-C Supported Employment, in the amount of $1,983,592.

VESID VOCATIONAL REHABILITATION DISTRICT OFFICES

The vocational rehabilitation program works with persons whose physical, mental or learning disability prevents them from obtaining employment. The mission of the vocational rehabilitation program is to place people in integrated employment settings to the maximum extent possible. Integrated employment includes the competitive employment setting as well as supported employment where assistance is provided at the job site to enable a person with a disability to learn the job tasks as well as make the necessary adjustment to the world of work.

Vocational rehabilitation services are delivered throughout the state by 15 district offices, each staffed with vocational rehabilitation counselors. The role of the counselor is to determine an applicant's eligibility for the program and develop jointly with persons found eligible a plan for obtaining employment. The plan may include assistance with a job search, training, support services or other assistance that is directly related to achieving the agreed-upon employment goal.

---

[1] Integrated Work Setting - A job site where most employees do not have disabilities, and, in performing job duties, the individual with a disability interacts on a regular basis with employees who are not disabled. This term may also refer to supported employment job placements.

VESID's vocational rehabilitation district offices are in the following locations:

ALBANY DISTRICT OFFICE
6 Tower Place, 1st Floor
Executive Park
Albany, NY 12203

INTEGRATED EMPLOYMENT

During FFY 1996-97, 16,487 people with disabilities received assistance in preparing for and obtaining employment, an increase of 7,486 since FFY 1990-91. The total annualized first-year earnings of these individuals was $186.9 million. This income results in increased State and local tax revenues. Annual public assistance savings as a result of these job placements was $22.6 million.

Of the individuals with disabilities who became employed, 11,131 were placed in competitive employment, compared to 5,450 in FFY 1990-91. The number of individuals with severe disabilities placed in supported employment[2] has also significantly increased, from 668 in FFY 1990-91 to 2,671 in FFY 1996-97. An important trend toward more integrated employment is indicated by the reduction in placements of individuals with disabilities in sheltered employment[3]. In FFY 1990-91, 2,373 people with most severe disabilities were placed in sheltered employment; in FFY 1996-97, there were 1,857 such placements.

In keeping with aligning resources to its Strategic Plan (described in Section VI), VESID has made a concerted effort to move funds from programs that traditionally were directed to sheltered employment placements to programs that lead to placement of individuals in integrated settings. VESID has worked with providers to "redesign" sheltered workshop programs to promote the employment of individuals with disabilities in their communities.

BUSINESS AND INDUSTRY AGREEMENTS

To help improve opportunities for employment or training programs for individuals with disabilities, VESID has signed a number of formal agreements during the past year. VESID also continued other agreements signed with business and industry organizations in previous years (listed below). In addition, VESID has ongoing relationships and informal agreements with other business and industry groups which promote employment opportunities for persons with disabilities.

- Labor Organizations and Associations
    - Agreement with the Greater New York Automobile Dealers Association
    - Agreement to form an alliance with the New York State AFL-CIO
    - Memorandum of Understanding with the New York State Food Merchants Association
    - Memorandum of Understanding with the New York State Restaurant Association

---

[2] Supported Employment - Paid competitive work performed by individuals with the most severe disabilities requiring intensive support services to obtain such employment and extended support to sustain such employment, and which is performed in an integrated setting which provides regular interactions with individuals who do not have disabilities, other than paid care givers.

[3] Sheltered Employment - Employment in a rehabilitation program for those who cannot be placed in a competitive manner. In such job sites, most employees have disabilities, and the individuals with disabilities have limited or no interaction with employees who are not disabled, other than with paid care givers.

- Regional Employment Alliances
  - Pizza Hut, Inc.
  - Monro Muffler
  - Marriott Corporation
  - Hardee's Restaurants
  - McDonalds Corporation

QUALITY ASSURANCE, CASE REVIEW and PROGRAM MONITORING

During FFY 1996-97, a number of initiatives were developed or enhanced to provide quality assurance monitoring of services delivered to consumers through the VESID District Offices and key community service providers. As a result of these monitoring activities, a number of findings have provided information and data that highlight important program and service delivery issues. These initiatives have provided important information for future inter-and intra-agency program planning and will contribute to the ability to measure progress and results in relation to the overall strategic plan for vocational rehabilitation.

VESID Case Review Process

Case reviews were conducted in all 15 District Offices. The information collected from these reviews was used to identify corrective actions to increase the provision of effective, high quality services.

Corrective actions included:

- Reviews conducted on a regional basis which enabled VESID to review each District Office annually.

- The design of a District Office corrective action process that allows for a review and discussion of the District Office Plan for addressing case review findings.

A review of the Fast Track Process was also conducted during the year. The process was developed between New York City District Offices and Community Rehabilitation Programs to expedite the provision of services to individuals with severe disabilities who are already known to the rehabilitation community. The results of the review were used to revise the process. One of the recommendations from the review was the development of a manual, to be shared with other District Offices as part of VESID's ongoing benchmarking efforts.

PROGRAM MONITORING PROCESSES

VESID conducts program monitoring to ensure the provision of high quality services by providers and to maximize the opportunity for integrated employment for VESID consumers. On-site visits are conducted at nonproprietary providers of services including community rehabilitation agencies and Board of Cooperative Educational Services (BOCES) programs. Such on-site reviews provide an opportunity to review program structure and results. In addition, a random sample of consumer case records are reviewed and a sample of consumers are interviewed to determine their satisfaction with services.

Sunset Evaluations - New Program Reviews

In 1992, VESID instituted a formal program evaluation system for new, nonproprietary providers. Approvals of such new programs are for an initial period of one year during which VESID reviews the employment results of each program. The approval automatically "sunsets" at the conclusion of the first year if the program is not determined adequate for continued approval and use by VESID. During 1996-97, 32 programs entered the program evaluation/sunset system.

Supported Employment - Contract Monitoring

Since June 1993, VESID conducted on-site visits of supported employment providers. (There are a total of 112 such providers with whom VESID contracts for supported employment.) The on-site reviews are augmented by a data reporting system focused on key performance indicators. This information permits VESID to identify key trends and success factors, as well as areas in need of review and improvement. During 1996-97, 76 programs were reviewed in this manner.

Future Monitoring Initiatives

All monitoring associated with New York State's vocational rehabilitation program will be enhanced to include a review of key performance data, as depicted in Section VI of this report. In addition, using the procedures established for the Sunset Review System, results-based expectations are being achieved and existing programs are being converted to a results-based model, as appropriate. During this period, 28 existing programs were converted from a unit of service payment process to a results-based process in which payment is based upon achievement of a successful outcome.

INTERAGENCY COLLABORATION IN ACHIEVING INTEGRATED EMPLOYMENT

Interagency collaboration and the effective development and coordination of services and supports has led to substantial gains in integrated employment results for individuals with disabilities. Chapter 515 of the Laws of 1992 established SED as having the "responsibility to stimulate the development of programs intended to furnish opportunities for integrated employment including but not limited to, supported employment and paid competitive work, to individuals with severe disabilities, and to coordinate with State agencies responsible for furnishing necessary services to individuals with severe disabilities related to such opportunities."

VESID provides assistance to individuals which is primarily focused on developing skills and abilities necessary to obtain or maintain employment. For many individuals, critical to maintaining these employment results is the receipt of support services such as residential, clinical, transportation or other related supports typically provided under the auspices of such State agencies as the Office of Mental Retardation and Developmental Disabilities (OMRDD), Office of Mental Health (OMH), Office of Children and Families Services (OCFS) and the Office of Alcoholism and

Substance Abuse Services (OASAS). Collaboration between VESID and these interagency partners has resulted in increased community based employment results for people with disabilities.

People with disabilities employed as a result of interagency collaboration consistently increased from 16,327 in 1992 to 27,460 in 1997. During this same time period, there have been corresponding increases in both integrated employment and supported employment.

Other results and examples of interagency collaboration are:

- OMRDD has decreased placements in State-operated workshops over the last three years by approximately 50%.
- VESID has reduced the number of VESID consumers employed in long-term sheltered employment from 18% of its outcomes to 11% of its outcomes, with a targeted goal of 9%.
- Planning continues with OMH in the allocation of extended service opportunities at the county level.
- In cooperation with the Developmental Disabilities Planning Council (DDPC), funding was secured for a total of nine placement consortia, which are intended to share job matching capacity through technology initiatives and to facilitate and create a more efficient job development process.
- In cooperation with the DDPC, funding was secured for 10 portable workstations for VESID counselors to explore the impact and efficacy of an "Office Without Walls" concept to allow counselors to serve individuals in the community in a more timely manner.
- In collaboration with the DDPC and Department of Labor, funding was secured for the Job Service Employer Committees (JSEC) to provide regional workshops for employers related to tax incentives for hiring individuals with disabilities as well as providing regional access to local workforce development partnerships.

INDEPENDENT LIVING CENTERS

Independent Living Centers (ILCs) are private, community-based programs that provide a variety of services to people with disabilities. These nonresidential, nonmedical service centers are administered by a board of directors, the majority of whom have a disability.

Centers work within their communities to address architectural, communication and attitudinal barriers that prevent people with disabilities from participating fully in community life. ILCs have been established in the following 35 locations: Albany, Amsterdam, Auburn, Batavia, Binghamton, Bronx, Brooklyn, Buffalo, Corning, Delaware County, Glens Falls, Harlem, Ithaca, Jamestown, Kingston, Manhattan, Massena, Middletown, Nassau County, Newburgh, Niagara Falls, Olean, Plattsburgh, Poughkeepsie, Queens, Rochester, Rockland County, Staten Island, Suffolk County, Syracuse, Troy, Utica, Watertown, White Plains, and Yonkers.

IMPROVING PROGRAM SERVICES AND RESULTS

During 1996-97, the State Education Department and VESID continued to implement a strategic plan to raise the level of learning of all New Yorkers, including adults with disabilities. Goals and objectives have been established to focus upon key aspects of each program and provide an objective basis for program evaluation and program planning. The specific components of these plans, including a detailed analysis of results to date, are presented in Section VI of this report.

SECTION VI

1996 - 1997

PERFORMANCE REPORT

The

STRATEGIC PLAN

VESID

Prepared for the

UNITED STATES DEPARTMENT

OF EDUCATION

By

THE NEW YORK STATE

EDUCATION DEPARTMENT

SECTION VI. STRATEGIC PLAN

STATE EDUCATION DEPARTMENT MISSION AND GOALS

In December 1995, the New York State Board of Regents voted unanimously to create and carry out a strategic plan to achieve the mission of the State Education Department (SED): "To raise the knowledge, skill, and opportunity of all the people in New York." Consistent with its mission, the Board of Regents will evaluate progress based on six goals:

1. All students will meet high standards for academic performance and demonstrate the knowledge and skills required by a dynamic world.
2. All educational institutions will meet Regents high performance standards.
3. The public will be served by qualified, ethical professionals who remain current with best practice in their fields and reflect the diversity of New York State.
4. Education, information and cultural resources will be available and accessible to all people.
5. Resources under our care will be used or maintained in the public interest.
6. Our work environment will meet high standards.

VESID MISSION AND STRATEGIC PLAN

The Boards of Regents' call for high educational standards is applicable to all students regardless of considerations such as race, gender, marital status, color, religion, national origin or disability. Understanding that we are all not the same, however, the expectation that all will excel must be coupled with the recognition that individual talents and abilities, interests and emotions, strengths and needs must be addressed in order to provide each individual an equitable opportunity to learn and achieve. Therefore, the mission of the Office of Vocational and Educational Services for Individuals with Disabilities (VESID) is: "To promote educational equity and excellence for students with disabilities while ensuring that they receive the rights and protections to which they are entitled; assure appropriate continuity between the children and adult services systems; and provide the highest quality vocational rehabilitation and independent living services to all eligible persons as quickly as those services are required to enable them to work and to live independent, self-directed lives."

Progress in achieving VESID's mission will be evaluated based on six goals. The six goals are listed below, referencing the pages in which specific objectives, performance results and data summaries are presented for 1996-97.

1. Students receiving special education services will meet high educational standards. (See pages VI.6 to VI.48 and Appendices A and B)

2. Students receiving special education services will be integrated with their nondisabled peers throughout their educational experience. (See pages VI.49 to VI.74 and Appendices C and D)

3. Individuals with disabilities will participate successfully in postsecondary education, including colleges and universities, adult education, technical preparation and proprietary schools. (See pages VI.75 to VI.78)

4. Individuals with disabilities will be employed in integrated work settings. (See pages VI.78 to VI.80)

5. All services for which VESID has responsibility will be cost effective. (See pages VI.81 to VI.84)

6. VESID services and work environment will meet high standards and continuously improve. (See page VI.85 to VI.90)

STATISTICAL SUMMARY INFORMATION

The balance of this section will present objectives, results and statistical information relating to each goal, as well as additional data and summaries which should be considered in evaluating the effectiveness of special education and vocational rehabilitation services in New York State. The additional data and summaries address the Comprehensive System of Personnel Development (pages VI.91 to VI.94), Procedural Due Process Safeguards (pages VI.94 to VI.97) and Extended School Year Programs (page VI.98). (Please note: The State Education Department is not the designated lead agency for the provision of early intervention services. Therefore, specific goals and standards are not presented in this section for infants and toddlers with disabilities, from birth to two years of age.)

It should also be noted that a more comprehensive review and analysis of the current and projected special education personnel needed for the provision of services to preschool and school-age students with disabilities is included in a separate SED publication, the Special Analysis Report – Special Education Personnel. To receive a free copy of the Special Analysis Report, contact VESID at the address and telephone number listed on the last page of this publication.

THE NEED/RESOURCE CAPACITY INDEX

The SED Office of Elementary, Middle, Secondary and Continuing Education (EMSC) has developed a Need/Resource Capacity (N/RC) index which is used to categorize school districts into similar groups based on indicators of relative district wealth, population density and some important characteristics of resident students' special needs. An understanding of N/RC will be helpful in considering the information presented in this section.

The following definition has been excerpted from the SED Report to the Governor and Legislature on the Educational Status of New York State's Schools, submitted April 1998. It provides a definition for each N/RC category. Most of the data presented under goals 1 and 2 are summarized by these N/RC categories. In Appendix B, the N/RC category is indicated for each school district to facilitate comparison among similar types of school districts.

The need/resource capacity index, a measure of a school district's ability to meet the needs of its students with local resources, is the ratio of the estimated poverty percentage[1] (expressed in standard score form) to the Combined Wealth Ratio[2] (expressed in standard score form). A district with both estimated poverty and Combined Wealth Ratio equal to the State average would have a need/resource capacity index of 1.0. Need/Resource Capacity (N/RC) Categories are determined from this index using the definitions in the table below.

Need/Resource Capacity Category	Definition
1) New York City	New York City
2) Large City Districts	Buffalo, Rochester, Syracuse, Yonkers
High N/RC Districts	
3) Urban-Suburban	All districts at or above the 70th percentile (1.181) which meet one of the following conditions: 1) more than 100 students per square mile or 2) have an enrollment greater than 2,500 and more than 50 students per square mile.
4) Rural	All districts at or above the 70th percentile (1.181) which meet one of two conditions: 1) fewer than 50 students per square mile or 2) fewer than 100 students per square mile and an enrollment of less than 2,500.
5) Average N/RC Districts	All districts between the 20th (0.785) and 70th (1.181) percentile on the index.
6) Low N/RC	All districts below the 20th percentile (0.785) on the index.

---

[1] **Estimated Poverty Percentage:** A weighted average of the 1991 kindergarten through grade 6 percent free/reduced price lunch and the 1990 Census poverty percentage. (An average was used to mitigate measurement errors in each measure.) The result is a percentage that more closely approximates the percentage of children eligible for free- and reduced-price lunches than the percentage below the federally established poverty line.

[2] **Combined Wealth Ratio**: The ratio of district wealth per pupil to State average wealth per pupil.

Another way that data are presented under goals 1 and 2 contrasts results in the 45 High Need School Districts versus all school districts. The 45 High Need School Districts are districts with the highest extraordinary needs percentage, based on 1996-97 data. The extraordinary needs percentage was used to calculate the 1998-99 State Aid projections. The extraordinary needs percentage is calculated by dividing the sum of the following counts by the district enrollment used for State Aid purposes:

- Number of students eligible for the free- and reduced-price lunch program;
- Number of students with limited English proficiency; and
- Scarcity count for school districts where the number of enrolled students per square mile is fewer than 11.5.

The list of the 45 High Need School Districts follows:

The 45 High Need School Districts

Name	County
Addison CSD	Steuben
Albany CSD	Albany
Belleville Henderson CSD	Jefferson
Binghamton City SD	Broome
Brentwood UFSD	Suffolk
Brushton-Moira CSD	Franklin
Buffalo City SD	Erie
Central Islip UFSD	Suffolk
Cincinnatus CSD	Cortland
Clifton-Fine CSD	St. Lawrence

Van Hornesville-Owen D. Young CSD	Herkimer
Watervliet City SD	Albany
Westbury UFSD	Nassau
Wyandanch UFSD	Suffolk
Yonkers City SD	Westchester

The N/RC index and 45 High Need School Districts refer to public school districts only. Moreover, these two categorization methods are duplicative, in that they each consider the same 689 school districts according to different criteria. The 45 High Need School Districts are almost completely comprised of school districts in N/RC categories 1, 2, 3 and 4.

A summary of school districts according to N/RC category and High Need follows:

Need/Resource Capacity and High Need School District* Comparison
Fall 1996 and December 2, 1996

Groups of Schools	Number of School Districts	Fall 1996 Enrollment in Public and Non-Public Schools	Percent of Total Enrollment	December 2 Count of Preschool Students with Disabilities	Percent of Preschool Students with Disabilities	December 2 Count of School Age Students with Disabilities	Percent of School Age Students with Disabilities

---

* These data include public school districts only (not including 16 Special Act School Districts). All data related to State assessment measures include data provided by Special Act School Districts. On December 2, 1996, Special Act School Districts served 2,794 students with disabilities.

** See pages VI.3 and VI.4 for definition of N/RC categories and list of 45 High Need School Districts.

GOAL 1: STUDENTS RECEIVING SPECIAL EDUCATION SERVICES WILL MEET HIGH EDUCATIONAL STANDARDS.

Objective A: 80 percent of students receiving special education services who complete secondary education will exit with a Regents, local or High School Equivalency (HSE) diploma.

Results 1996-97

- 70.8 percent of New York State students with disabilities who completed secondary education graduated with a Regents, local or High School Equivalency diploma. This is a 3.5 percent increase since 1995-96. The number of students graduating with a Regents or local diploma has increased annually for more than a decade.
- The diploma rate for students with disabilities in the 45 High Need School Districts was 63 percent, compared to 76 percent in the other districts.
- The diploma rate ranged from 49 percent in the urban-suburban high N/RC school districts to 89 percent in the low N/RC school districts.
- The diploma rate among each of the two largest disability categories, learning disabled and emotionally disturbed, was 76 percent, compared to 43 percent for all other disability categories (based on reports from the public school districts only).
- 78 percent of all High School Equivalency diplomas granted to students with disabilities were in New York City.
- 68 percent of all students with disabilities reaching maximum age before exiting special education without a credential were in New York City.

Objective B: No more than 20 percent of students receiving special education services will exit with a high school individualized education program (IEP) diploma or local certificate.

Results 1996-97

- 26.4 percent of students with disabilities earned an IEP diploma or a local certificate. During the 1995-96 school year, 30.0 percent of students with disabilities exited in this manner.
- 32 percent of students with disabilities earned an IEP diploma or local certificate in the 45 High Need School Districts compared to 23 percent of students in the other school districts.
- The rate of granting IEP diplomas/certificates to students with disabilities ranged from 10 percent in the low N/RC districts to 50 percent in the urban-suburban high N/RC school districts.
- 21 percent of students with emotional disturbance and 22 percent of students with learning disabilities earned IEP diplomas or local certificates, compared to 52 percent for students with other disabilities.

GOAL 1

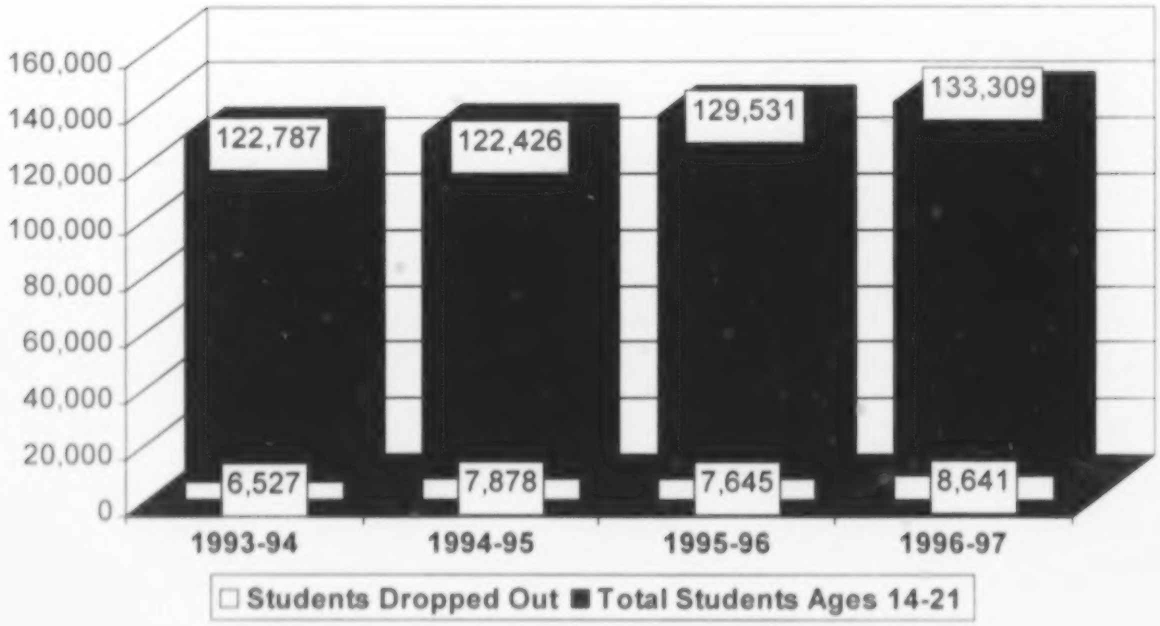
Objective C: Decrease the percent of students receiving special education services who drop out before exiting with a Regents, local, High School Equivalency (HSE) diploma, Individualized Education Program (IEP) diploma, local certificate or no credential (due to student age).

Results 1996-97
- 6.5 percent of students with disabilities, ages 14-21, dropped out of school. This is a 0.6 percent increase since 1995-96
- Comparison of school districts by Need/Resource Capacity categories indicates that the drop out rate ranged from 2 percent in low N/RC school districts to 11 percent in New York City.
- The drop out rate was 10 percent in the 45 High Need School Districts compared to 4 percent in other school districts.
- Students disabled due to emotional disturbance represented 16.7 percent of all students with disabilities, ages 14-21, but accounted for 25.6 percent of all students who dropped out.

Percent of Students with Disabilities Dropping Out Based on Enrollment of Students with Disabilities, Ages 14-21



1993-94: 5.3 percent of students with disabilities dropped out
1994-95: 6.4 percent of students with disabilities dropped out
1995-96: 5.9 percent of students with disabilities dropped out
1996-97: 6.5 percent of students with disabilities dropped out

The dropout rates for all students (combining general education students and students with disabilities) for the 1994-95 and 1995-96* school years were 4.1% and 3.6% respectively.

---

* 1995-96 is the most current year for which data are available.

GOAL 1
Data Related to Objective C

PERCENTAGE OF STUDENTS DROPPING OUT BY THE TYPE OF SCHOOL DISTRICT
1996-97

School District	Students Ages 14-21	Students Dropping Out	Percent Dropping Out
New York City	47,131	5,166	11.0%

GOAL 1

Objective D: 95 percent of students receiving special education services will participate in each Pupil Evaluation Program (PEP) test. 85 percent of students participating will achieve the Statewide Reference Point (SRP)

Results 1996-97
(PEP tests)

- 92.2 percent of students with disabilities participated in the PEP test program. This is a 0.1 percent decrease since 1995-96 but a 0.8 percent increase since 1993-94. Of students participating in the PEP test program, 63.7 achieved the SRP. This is a 12.4 percent increase since 1995-96 and a 16.4 percent increase since 1993-94.
- The rates of absenteeism on the day of testing in the 45 High Need School Districts ranged from 12.8 percent (grade 3 reading) to 22.8 percent (grade 6 mathematics). The rate of absenteeism in other school districts for the same tests were 3.3 percent and 6.3 respectively.
- The statewide exemption rate is highest for the grade 3 reading PEP test (11.8 percent) and lowest for the grade 6 mathematics PEP test (5.0 percent).
- The combined exemption rate on all PEP tests ranged from 5.2 percent in the low N/RC school districts to 11.4 percent in the rural high N/RC school districts.
- 45 percent of school districts that tested students with disabilities on any PEP test exempted no students, while 13 percent of school districts exempted more than 20 percent of students with disabilities from one or more PEP tests.
- Lower percentages of students with disabilities scored above the Statewide Reference Point on all PEP tests compared to general education students. The difference ranged from 15.5 percent (grade 3 math) to 39.4 percent (grade 6 reading).
- Significantly lower percentages of students with disabilities scored at levels higher than the Statewide Reference Point compared to general education students on all PEP tests. For example, 52.7 percent of general education students achieved the highest level (distinction) on the grade 6 reading test compared to 13.6 percent of students with disabilities.
- Lower percentages of students with disabilities scored above the Statewide Reference Point on all PEP tests in the 45 High Need School Districts than in other school districts: 27.6 percent compared to 59.3 percent on the Grade 6 test in reading, and 68.1 percent compared to 93.5 percent on the grade 3 test in mathematics.

Results 1996-97
(Other State
Assessments)

- Lower percentages of students with disabilities passed each Regents Competency Test in the 45 High Need School Districts compared to other school districts. For example, 32.3 percent of students passed the Regents Competency Test (RCT) in reading in the 45 High Need School Districts compared to 83.8 percent in other districts. For the RCT in mathematics, the passing rates were 45.3 percent and 61.7 percent respectively.
- General education students in the 45 High Need School Districts scored lower than students with disabilities in the other than 45 High Need School Districts on each Regents Competency Test.
- Lower percentages of students with disabilities participated in the Regents examinations compared to general education students. Between 18 and 36 percent of the special education average grade enrollment in grades 9 through 12 participated in English, Mathematics Course I, Global Studies, U.S. History and Government and Biology examinations compared to 73.2 percent to 92.3 percent of general education average grade enrollment in the same examinations.
- Between 42.8 and 57.1 percent of students with disabilities who were tested passed the Regents examinations (with a score of 65 or higher) listed in the previous finding compared to 68.9 percent to 84.4 percent of general education students.

- More students with disabilities scored between 55 and 64 on the five Regents examinations listed in the previous findings than general education students (12.8 percent to 20.5 percent of students with disabilities, compared to 8.4 to 12.3 percent of general education students).
- Lower percentages of students with disabilities were tested on five Regents examinations in the 45 High Need School Districts than in other school districts (14.7 to 31.8 percent compared to 19.6 to 37.1 percent respectively).
- Lower percentages of students with disabilities passed with a score of 65 or higher on the five Regents examinations in the 45 High Need School Districts compared to other school districts (17.0 to 29.1 percent compared to 51.7 to 67.2 percent respectively).
- Lower percentages of students with disabilities earned a score of 55 or higher on the five Regents examinations in the 45 High Need School Districts compared to other school districts (26.9 to 50.5 percent compared to 70.1 to 86.3 percent respectively).

Note: The 1996 and 1997 statistics include students tested in January and June.

*To facilitate local and regional planning, Regents Competency Test (RCT) data are presented for 1996-97 on a school district by school district basis in Appendix B-2.

**Beginning in 1995-96, the Education Department revised procedures for reporting student participation and achievement in Regents Competency Tests. Students taking the same content area test more than once were to be counted one time, according to their highest test score.

***Use of such data for trend analysis is limited due to test administration procedures implemented by the New York City Board of Education.

GOAL 1

Data Related to Other State Assessment Measures

Performance on the Regents Competency Tests By Need/Resource Capacity of School Districts*

1996-97

Need/Resource Capacity Category	Percent Passing

GOAL 1

Objective E: Students receiving special education services and participating in workforce preparation programs will pass occupational education proficiency examinations at the same rate as their nondisabled peers.

Results 1996-97

- 55.6 percent of students with disabilities passed the Introduction To Occupational Education proficiency examination compared to 78.5 percent of general education students. Compared to 1995-96, there was a decrease of 2.5 percent and 2.3 percent, respectively, for special education and general education students.
- 66.1 percent of students with disabilities and 86.6 percent of general education students passed advanced occupational education proficiency examinations. Compared to 1995-96, there was a decrease of 0.7 percent and an increase of 1.1 percent, respectively, for special education and general education students.

*% Pass represents weighted averages of January and June 1995 test administrations for total State.

GOAL 2

GOAL 2: STUDENTS RECEIVING SPECIAL EDUCATION SERVICES WILL BE INTEGRATED WITH THEIR NONDISABLED PEERS THROUGHOUT THEIR EDUCATIONAL EXPERIENCE.

Objective A: The percentage of preschool students receiving special education services (pursuant to Section 4410 of Education Law) in integrated or natural settings will approximately equal the percentage of school-age students in integrated settings.

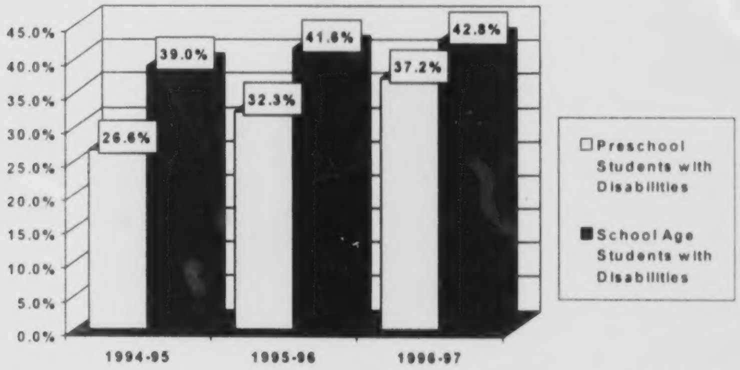
Results 1996-97
According to December 2, 1996 data:

- 37.2 percent of preschool students received services in integrated or natural settings. This is a 10.6 percent increase since 1994-95. (This is especially significant as the number of public schools operating approved preschool programs decreased from 83 in 1994-95 to 44 in 1996-97).
- Fewer preschool students received special education services in integrated settings in the 45 High Need School Districts (36.7 percent) compared to students in other school districts (48.0 percent).
- Preschool students in New York City were primarily provided special education services in separate settings (84.2 percent). Regionally, this represents the highest rate of children served in separate settings.
- Approved private schools served 75.8 percent of all preschool students with disabilities, while public school districts, BOCES and the State-operated and State-supported schools served the balance of such students.
- Of the seven largest states in the nation with the largest special education population, New York had the largest percentage of children, ages 3-5, classified due to disabilities (5.82 percent).

According to data collected for a ten-month period (September 1, 1996 to June 30, 1997):

- 37 percent of preschool students received related services and/or special education itinerant teacher (SEIT) services. 26 percent of preschool students received half-day special class services and the remaining 37 percent received special class services in a full-day (more than 2.5 hours) basis.
- 45.1 percent of preschool students with disabilities in the 45 High Need School Districts received full-day special class (more than 2.5 hours per day) services compared to 30.3 percent of students in other school districts.
- 26.9 percent of preschool children with disabilities receive related services and/or SEIT services in the 45 High Need School Districts compared to 46.3 percent of students in other school districts.

Percentages of Students with Disabilities Receiving Special Education Services in Integrated Settings
December 2, 1996



Integrated settings for preschool students with disabilities are defined as special education services provided at home, part-time or full-time in typical early childhood programs

School age students with disabilities are in integrated settings when they are enrolled in general education classes for 80% or more of the school day

GOAL 2
Data Related to Objective A

Percentages of Preschool Students with Disabilities Receiving Special Education Services in All Settings

Preschool Setting	December 1, 1994	December 1, 1995	December 2, 1996

GOAL 2

Data Related to Objective A

For the first time, in 1996-97 data were collected regarding the type of education services provided to preschool students with disabilities at any time during a ten-month time period. Starting in 1997-98, such data will be collected for a twelve month period.

Type of Preschool Special Education Programs and Services Received by Students with Disabilities (September 1, 1996 to June 30, 1997) By Need/Resource Capacity Category of School Districts* and Other Groupings of School Districts

Program/Placement	Need/Resource Capacity Category						High Need or Not**		Total State

Goal 2
Data Related to Objectives A and E

Percentage of Children
Served Under IDEA, Part B By Age Group
During the 1995-96 School Year in the Seven Largest States
(Based on Estimated Resident Population)

State	Ages 3-5	Ages 6-17	Ages 18-21	Total Ages 3-21
Florida	4.50	12.32	1.86	9.00
New York	5.82	11.14	2.56	8.51
Illinois	4.51	10.91	1.64	7.99
Texas	3.42	11.02	2.03	7.95
Ohio	3.79	10.25	2.01	7.57
Pennsylvania	4.17	9.16	1.87	6.93
California	3.21	9.01	1.32	6.44

Source: The 19th Annual Report to Congress on the Implementation of the Individuals with Disabilities Education Act: Appendix A-33. The percentage of children served is based on U.S. Census Bureau estimated resident population by State for July 1995.

GOAL 2

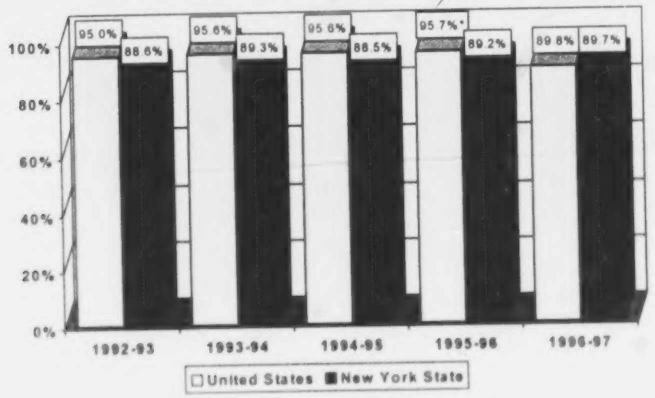
Objective B: The percentage of school-aged students with disabilities receiving services in general education buildings will reach the national average.

Results 1996-97

- 89.8 percent of New York State students with disabilities received services in general education buildings. This is a 0.6 percent increase since 1995-96, and a 1.2 percent increase since 1992-93. The national average for 1995-96 is 95.7 percent.
- Fewer students with disabilities were educated in general education buildings in the 45 High Need School Districts (88.1 percent) compared to other school districts (92.4 percent).
- Regionally, New York City placed the lowest percentage of students with disabilities in general education buildings (87.1 percent).
- Of the seven largest states, New York has the largest percentage of students with disabilities in separate education settings.
- 70 to 80 percent of students (ages 6-21) determined to have disabilities due to deafness, deaf-blindness or autism were educated in separate educational settings.
- Approximately one third of students (ages 6-21) determined to have disabilities due to emotional disturbance or mental retardation were provided special education services in separate education settings.
- Students (ages 6-21) in the 45 High Need School Districts were placed in separate education settings at a greater rate (11.9 percent) compared to students in other districts (7.6 percent).
- During the 1996-97 school year, school districts were asked to report on the number of school-age students with disabilities who attended their home school building (i.e., the building the student would have or could have attended if the student did not have a disability). School districts reported that 229,993 students (60.5 percent) attended their home school building.

Goal 2
Data Related to Objective B

Percentages of School-Aged Students with Disabilities (Ages 6-21) in General Education Buildings



*Data are as of August 22, 1997

Objective C: The percentage of school-aged students with disabilities in general education classrooms will exceed the national average.

Results 1996-97

- 42.8 percent of New York State students with disabilities received services in regular class. This is a 1.2 percent increase since 1995-96, and a 6.6 percent increase since 1992-93. The national average for 1995-96 is 45.3 percent.
- Of the seven states with the largest special education populations, New York had the third largest percentage of students with disabilities (ages 6-21) educated in general education classrooms for 80 percent or more of the school day.
- Half or more of students (age 6-21) determined to have a disability due to hard of hearing, learning disabilities, orthopedic impairment, other health impairment or visual impairment were enrolled in general education classes for 80 percent or more of the school day.
- Fewer students with disabilities (ages 6-21) in the 45 High Need School Districts were placed in general education classrooms for 80 percent or more of the school day (40.0 percent), compared to students in other school districts (45.8 percent). Also, almost twice as many students in the 45 High Need School Districts spent less than 40 percent of the school day in general education classes with nondisabled peers, compared to other districts.

Percentages of School-Aged Students with Disabilities (Ages 6-21) in General Education Classrooms

* U.S. Department of Education, Office of Special Education and Rehabilitative Services, OSEP Data Dictionary. March 1996 placement definitions:
0-20% - Place where children and youth with disabilities receive a majority of their education program with nondisabled children and youth, receiving special education and related services outside that classroom for less than 21 percent of the school day. 21-60% - Children and youth with disabilities receiving special education and related services outside the regular classroom for 60 percent or less of the school day and at least 21 percent of the school day. 61-100% - Children and youth with disabilities receiving special education and related services outside the regular classroom for more than 60 percent of the school day [on a regular school campus].

** 1995-96 is the most recent year for which national data were available at the time this report was developed. These data are as of August 22, 1997.

*** Revised data for 1992-93 resulted from ongoing data verification procedures implemented by the New York City Board of Education.

**** Article 65 of New York Education Law and Part 100 of the Regulations of the Commissioner of Education specify standards and procedures applicable in those instances in which parents voluntarily exercise their right to provide required instruction at home. Students with disabilities who receive instruotion at home in this manner are included in this placement category if the public school provided special education or related services as specified on an IEP.

GOAL 2
Data Related to Objectives B and C

45 High Need Districts***	173,816	40.0	3.4	44.7	11.9
Other Public School Districts	184,395	45.8	22.3	24.2	7.6

* See page VI.3 for definition of Need/Resource Capacity Categories and page VI.5 for enrollment information.

** Separate settings are those attended by students with disabilities only. Such settings include public separate facility, private separate facility, public residential facility, private residential facility, and home/hospital placement.

*** See page VI.4 for list of 45 High Need School Districts.

GOAL 2

Data Related to Objectives B and C

Buildings and Facilities in Which School-Age Students with Disabilities Received Special Education Programs or Services by a BOCES on December 2, 1996*

Type of Building/Facility	Number	Percent of Total
Number of all students with disabilities provided special education programs or services by BOCES in a public school building/facility.	17,257	60.9
Number of all students with disabilities provided special education programs or services in a BOCES building/facility also attended by general education students (i.e., nondisabled students).	3,238	11.4
Number of all students with disabilities provided special education programs or services in other settings/facilities (e.g., supported employment settings).	719	2.5
Number of all students with disabilities provided special education programs or services in a BOCES building/facility attended by students with disabilities only.	6,840	24.2
Number of all students with disabilities provided special education programs or services by BOCES in their home or in a hospital.	279	1.0
Total	28,333	100%

* Next year, these data will be presented disaggregated for students provided special class services and students provided other than special class services.

GOAL 2

Data Related to Objectives B and C

School-Age Students with Disabilities (Ages 4-21) Suspended for Disciplinary Reasons*

July 1, 1996 to June 30, 1997

Data regarding "Out of School" suspensions were collected for the first time in 1996-97 and are summarized below.

Disability Category	Cumulative School Days Suspended (Ages 4-21)				Total Number of Students Suspended	Percent Suspended by Disability
	1 Day	2-5 Days	6-10 Days	Over 10 Days		
Autistic	4	18	2	8	32	0.1
Emotionally Disturbed	799	4,629	1,804	665	7,897	32.1
Learning Disabled	1,955	8,525	2,436	898	13,814	56.1
Mental Retardation	78	308	121	42	549	2.2

Traumatic Brain Injured	379	0.3	47	0.5	11	0.1	70	0.3
Total	131,287	100%	10,276	100	8,641	100	24,629	100

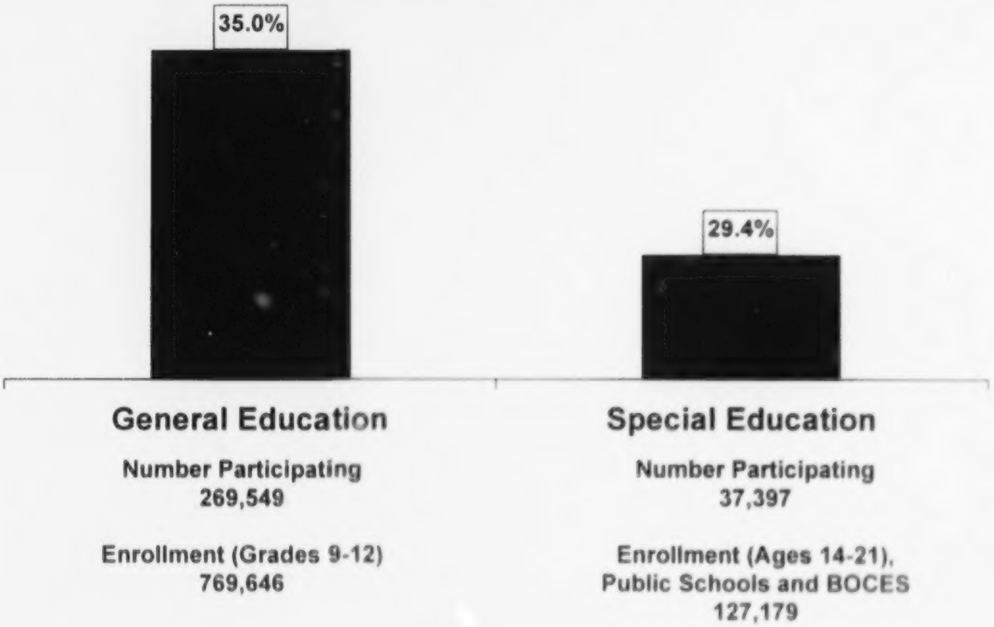
*Graduates are students with disabilities who left school with a Regents, local or High School Equivalency diploma.

GOAL 2

Objective D: **The percentage of students receiving special education services and who participate in workforce preparation programs will be equal to the percentage of their nondisabled peers participating in such programs.**

Results 1996-97:
- 29.4% percent of students with disabilities participated in workforce preparation programs, while 35% of general education participated in such programs.

Participation of Students with Disabilities in Occupational Education Programs 1996-97



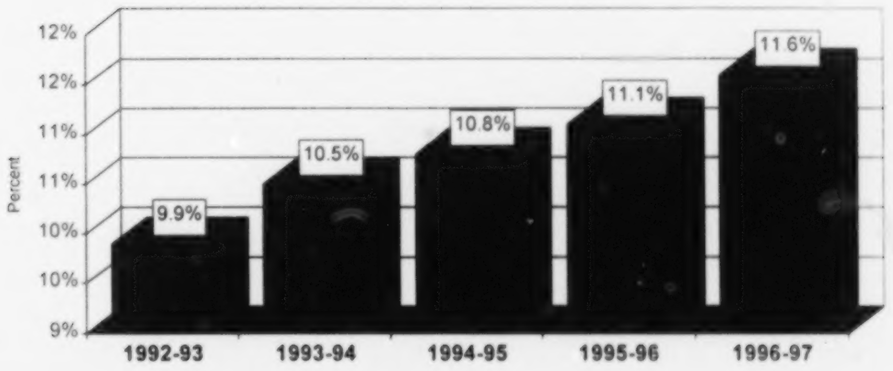
GOAL 2

Objective E: The percentage of school-aged students classified due to a disability and provided special education services will decrease.

Results 1996-97

- 11.6 percent of school-aged students were classified due to a disability. This is a 1.7 percent increase since 1992-93 and a 0.5 percent increase since 1995-96.
- Students classified due to learning disabilities (54.9 percent), speech or language impairment (15.7 percent), or emotional disturbance (12.1 percent) represented 83 percent of all school-age students with disabilities. The other ten disability categories accounted for the remaining 17 percent of school-age students.
- 89 percent of all school-age students with disabilities are between the ages of 6 and 17; 4.5 percent are between ages 4 and 5; and 6 percent are between 18-21.
- The percentage of infants and toddlers with disabilities of the total number of all children and youth with disabilities has more than doubled from 1.6 percent on December 1, 1993 to 3.5 percent on December 2, 1996.

Classification Rates for School-Aged Students with Disabilities (Ages 4-21)



1992-93: 308,173 students with disabilities; 3,127,753 total students

1993-94: 333,743 students with disabilities; 3,168,546 total students

1994-95: 346,530 students with disabilities; 3,207,125 total students

1995-96: 362,202 students with disabilities; 3,255,765 total students

1996-97: 380,320 students with disabilities; 3,290,150 total students

GOAL 2

GOAL 2

Objective F: Increasing percentages of students receiving special education services will be declassified and participate in general education on a full-time basis.

Results 1997-97 • 4.5 percent (18,418) of preschool and school-age students with disabilities were declassified and returned to general education full-time. (10.7 percent of preschool students were declassified while still eligible to receive preschool special education services or upon transitioning to programs for school-aged students. 3.9 percent of school-age students with disabilities were declassified.)

*The State Education Department has established a noncategorical approach for identification of preschool students with disabilities. Therefore, data for such students are not available by disability category.

GOAL 3: INDIVIDUALS WITH DISABILITIES WILL PARTICIPATE SUCCESSFULLY IN POSTSECONDARY EDUCATION.

Objective A: The percentage of school-aged students receiving special education services who transition to postsecondary education will increase.

Results

- In 1996-97, 5,101 (35 percent) of students with disabilities who completed high school and for whom postsecondary plans data were reported planned to enroll in a 4-year, 2-year or other college. An additional 3,140 (21 percent) planned to enter employment or go into military service. Among students with disabilities who earned high school diplomas, the percentage planning to enter college was 45 percent while 18 percent of such students planned to enter employment or military service.
- Significantly greater percentages of students with disabilities in other than the 45 High Need School Districts planned to attend college than students in the 45 High Need School Districts (45.6 percent compared to 17.9 percent respectively).
- Postsecondary plans of high school completers with disabilities are not known for more than half of the students in the Large Five City School Districts, compared to 9 percent of students in the Low N/RC school districts.

Other School Districts	45.6%	23.8%	2.5%	6.0%	2.8%	19.3%	8,919

*See page VI.3 for definition of Need/Resource Capacity Categories, page VI.4 for list of 45 High Need School Districts and page VI.5 for enrollment information.

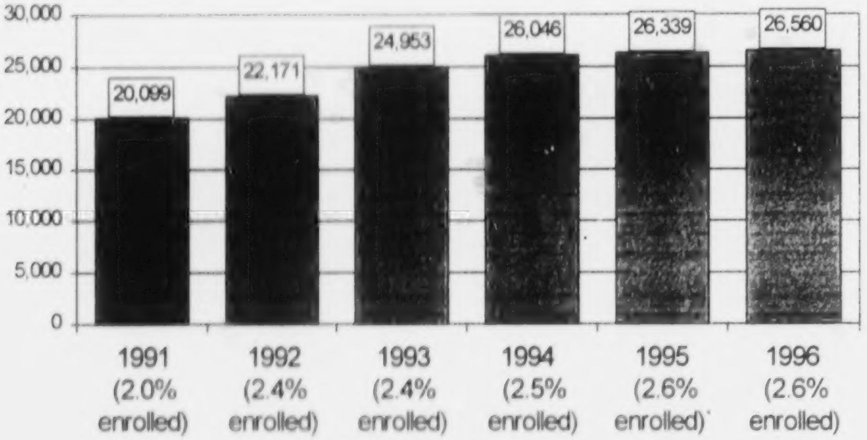
GOAL 3

Objective B: The percentage of individuals with disabilities enrolled in postsecondary education programs will increase.

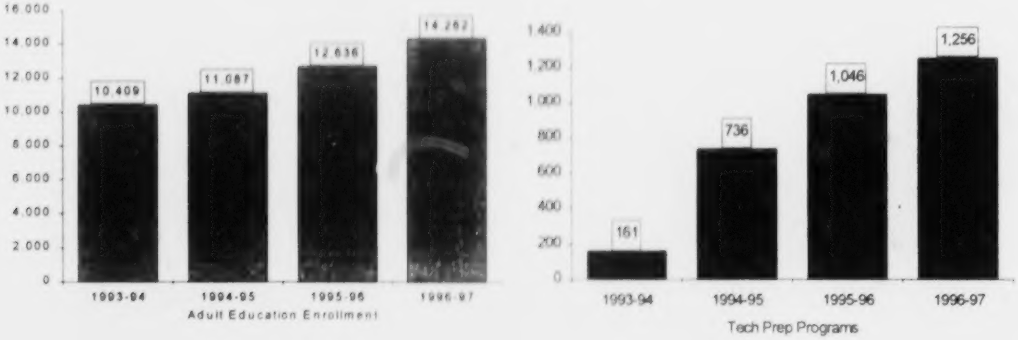
Results Fall 1996

- The number of self-identified individuals with disabilities who were attending institutions of higher education increased from the previous year; however, the percentage of individuals with disabilities in the total higher education enrollment remained the same (2.6 percent) as in the previous year.
- Increasing numbers of individuals with disabilities participated in adult education and Tech Prep programs (combined secondary and postsecondary education program leading to a two-year certificate or associate degree).

Enrollment of Individuals with Disabilities in Higher Education Programs



Enrollment of Individuals with Disabilities in Other Postsecondary Education Programs



GOAL 3

Objective C: Increasing numbers of individuals with disabilities will complete postsecondary education programs.

Results 1996-97 • During 1995-96, new data collection forms and procedures were developed in order to collect from institutions of higher education in New York State information regarding the number of self-identified individuals with disabilities successfully completing a higher education program. The new data collection forms and procedures began to be implemented during 1996-97; however, data were not available by the time required for this publication. Data for this objective will be included in the next edition of this report.

Objective D: The percentage of VESID sponsored students obtaining jobs will increase.

Results 1996-97 • Compared to 1995-96, there was a decrease of 1.7 percent of VESID sponsored students obtaining jobs. Students enrolled in associate degree and graduate degree programs were more successful compared to the previous year, while students enrolled in other programs were less successful than students in those programs the previous year.

Percentage of Individuals with Disabilities Sponsored by VESID In Postsecondary Education Institutions who Obtained Jobs

Type of Program	1995-96* Percent Obtaining Employment	1996-97* Percent Obtaining Employment	1996-97* Number Obtaining Employment
Bachelor Degree	58.9	58.5	966
Associate Degree	55.9	57.0	2,542
Nondegree	64.8	60.1	717
Graduate Degree	67.8	78.8	66
Business School	66.0	65.2	689
Trade School	68.8	61.6	1,604
Total	61.4	59.7	6,584

*Federal Fiscal Year

GOAL 4

INDIVIDUALS WITH DISABILITIES WILL BE EMPLOYED IN INTEGRATED WORK SETTINGS.

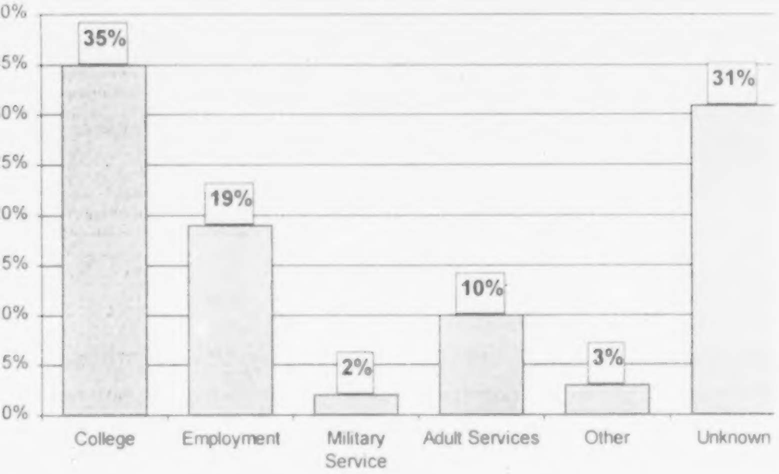
Objective A: The percentage of youth with disabilities who become employed after completing secondary education programs will increase.

Results 1996-97 • 2,835 students with disabilities (19 percent) who completed high school and for whom postsecondary plan data were reported planned to pursue employment. An additional 547 students who dropped out (6.4 percent of drop-outs) also planned to pursue employment. Almost twice as many students with disabilities planned to enter employment after high school in districts other than the 45 High Need School Districts.

GOAL 4

Data Related to Objective A and Goal 3, Objective A

Postsecondary Plans of High School Students with Disabilities
(For Students Who Completed High School)
1996-97

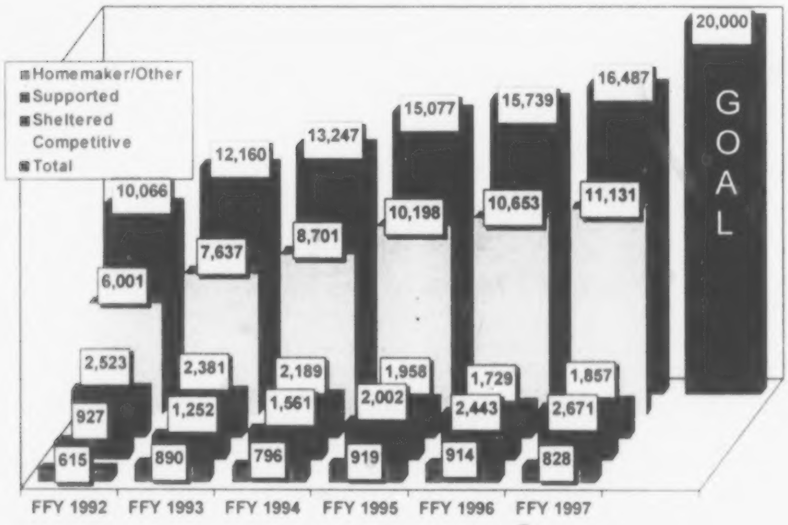


Objective B: VESID will place 20,000 individuals with disabilities in jobs annually, with increasing percentages in integrated settings.

Results 1996-97

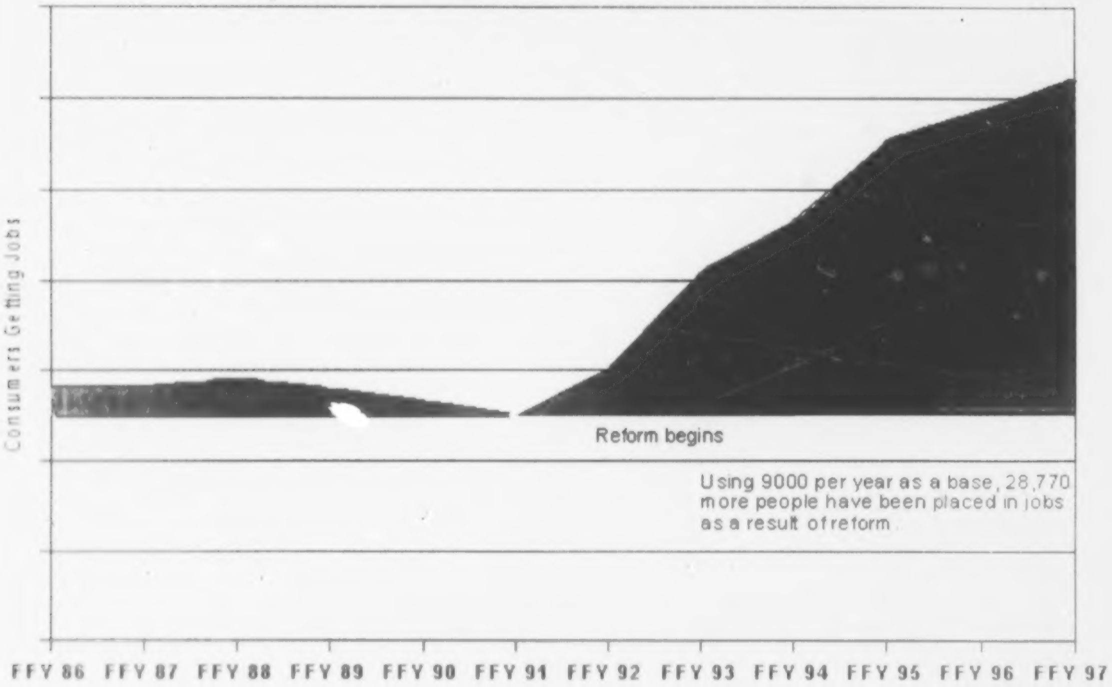
- In Federal Fiscal Year (FFY) 1997, the number of individuals placed in jobs increased by 4.7 percent. The number of placements in competitive employment increased 4.5 percent to 11,131. (This is more than the total number of placements in 1992.)
- Using 9,000 placements per year as a base, 28,770 more people with disabilities have been placed in jobs as a result of vocational rehabilitation efforts since 1991.

VESID Consumers Placed



GOAL 4
Data Relative to Objective B

Impact of VESID's Reform Efforts



GOAL 5: ALL SERVICES FOR WHICH VESID HAS RESPONSIBILITY WILL BE COST EFFECTIVE.

Objective A: Improved results will be achieved for goals 1-4, at the same or less cost.
Per pupil general and special education instructional costs were reported in the State Education Department's fiscal accountability supplement to the School Report Cards. A methodology to compute instructional costs was developed for 1994-95 and subsequent years. Statewide results are presented below. (1995-96 is the latest year for which data were available at the time this publication was developed.)

Results 1995-96
- 23.1 percent of instructional costs were incurred for the provision of special education services. This is a 0.2 percent increase over the previous year.
- 24.0 percent of transportation costs were incurred for the provision of transportation services to students with disabilities. This is a 1.0 percent decrease from the previous year and is the same as the percent in 1990-91.

General Education and Special Education Instructional Costs

School Years	General Education Instructional Costs	Special Education Instructional Costs	Total General and Special Education Instructional Costs	Percentage of Total Costs Attributed to Special Education
1994-95	14,295,131,480	4,238,079,652	18,533,211,132	22.87%
1995-96	14,556,410,586	4,364,846,184	18,921,256,770	23.07%

1995-96 General and Special Education Instructional Costs*

	General Education Instructional Costs	Special Education Instructional Costs	Total General and Special Education Instructional Costs	Percentage of Total Costs Attributed to Special Education
Total State	$14,556,410,586	$4,364,846,184	$18,921,256,770	23.07
Large Five Districts*	5,210,023,254	1,997,472,752	7,207,496,006	27.71
New York City	4,497,982,458	1,766,871,328	6,264,853,786	28.20

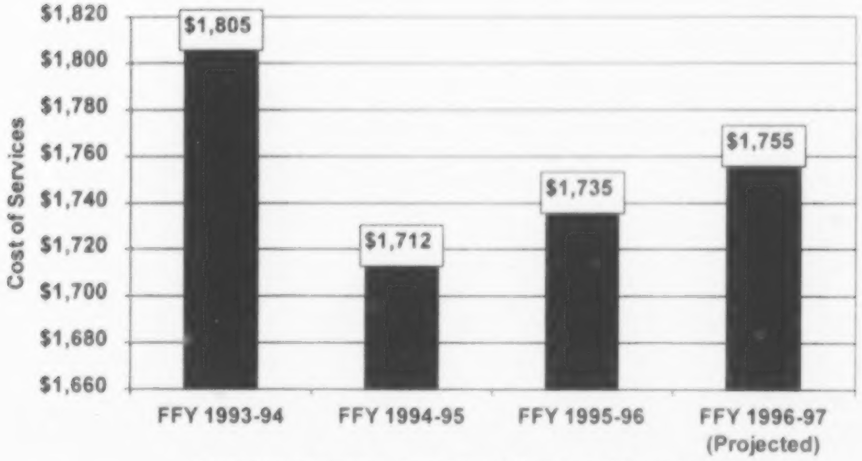
Program	**Local**	**State**	**Federal**	**Local**	**State**	**Federal**
Total Education	56%	39%	5%	55%	40%	5%
Special Education	55%	39%	6%	55%	40%	5%

Objective B: Savings in public assistance will increase and total earnings of individuals obtaining employment will increase.

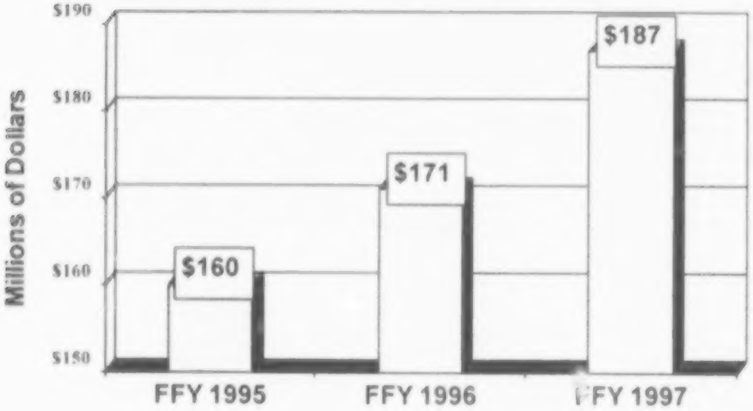
Results 1996-97
- The average cost per consumer for purchased vocational rehabilitation services increased by 1.0% over the previous year, remaining lower than the cost in 1993-94.
- Earnings for VESID consumers obtaining employment increased $16 million, from $171 million in 1995-96 to $187 million in 1996-97.
- Savings in public assistance increased by $3.6 million, from $19 million in 1995-96 to $22.6 million in 1996-97.

Average Annual Cost Per VESID Consumer for Vocational Rehabilitation Services



(Includes all costs: Purchased Service, Direct Service and Administrative)

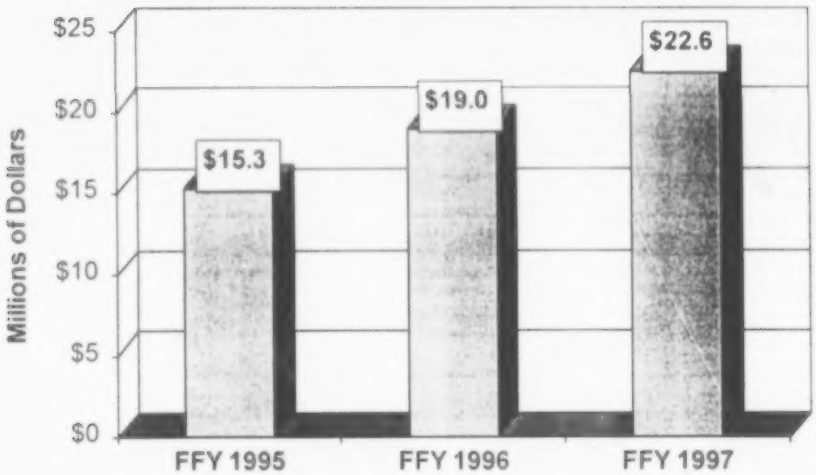
Annualized Earnings of VESID Consumers Obtaining Employment



GOAL 5

Data Related to Objective B

Public Assistance Savings through VESID Consumers Obtaining Jobs



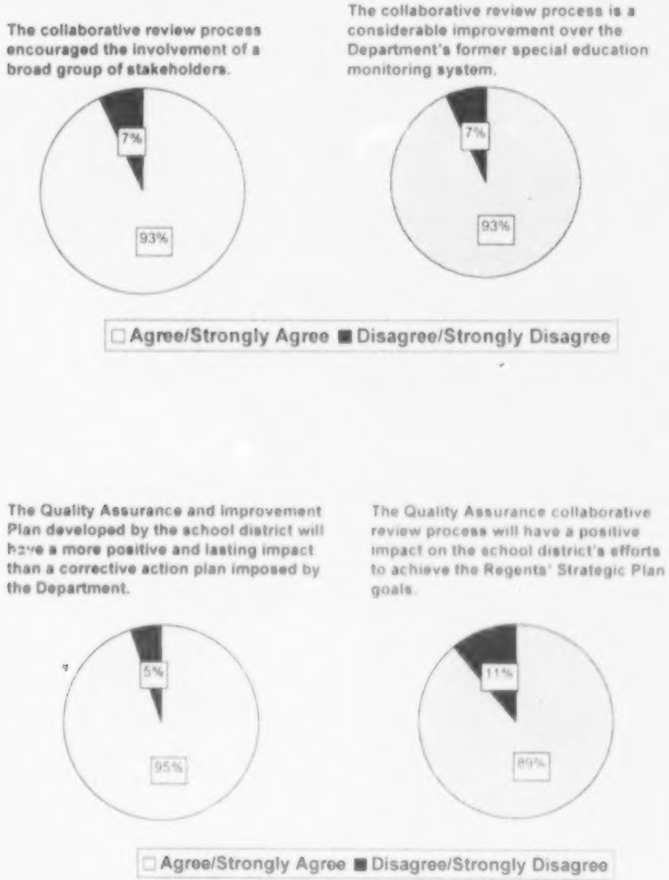
GOAL 6: VESID SERVICES AND WORK ENVIRONMENT WILL MEET HIGH STANDARDS AND CONTINUOUSLY IMPROVE.

Objective A: Customer satisfaction with VESID services and products will continuously improve. (Prior to 1996-97, the special education monitoring system focused on compliance with federal and State laws and regulations. The new Quality Assurance process also focuses on program effectiveness and student results. This process involves a team of school district staff, parents of students with disabilities and SED personnel working together to ensure both compliance and improved educational results. In many instances, SED provides financial support to school districts to make improvements.)

Results 1996-97

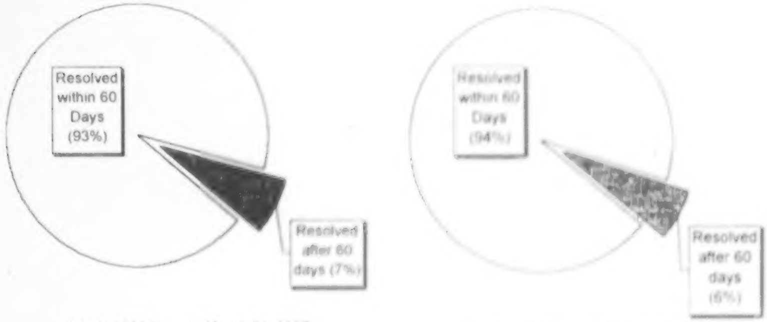
- The results of the 1997 Quality Assurance survey completed by school district staff and parents are presented below. Survey responses indicated strong satisfaction with the new Quality Assurance process and anticipation of positive results for students with disabilities.
- Regional SED personnel resolved 94 percent of all complaints within the required 60 days, an increase of 1 percent over the previous year.

Customer Satisfaction with the Special Education Quality Assurance Collaborative Review Process



GOAL 6
Data Related to Objective A

Customer Satisfaction with Special Education Complaint Management and Resolution
(April 1, 1997 through March 31, 1998)



July 1, 1996 through March 31, 1997

April 1, 1997 through March 31, 1998

Customer Satisfaction with the Vocational Rehabilitation Program

In November 1997, VESID Vocational Rehabilitation personnel completed its annual consumer satisfaction survey. The survey was revised to provide more specific information about vocational rehabilitation services from individuals who were successfully placed in jobs and those who were not. Consumers provided feedback on the quality of the services received from VESID, from the timely scheduling of appointments through placement in employment. The survey also included questions regarding the quality of services received from the service providers. The results of this survey are presented below.

Consumer Satisfaction Survey
Statewide Results in Percentages
For VESID and Service Providers

Questions	VESID Results	Provider of Services Results
Scheduled appointment promptly	88%	87%
Initiated Services Promptly	81%	83%
Helped Look for a Job	73%	75%
Staff Returned Phone Calls	82%	83%
Treated You With Respect and Courtesy	90%	91%
Provided You with Good Advice	82%	82%
Involved You in Decision Making	82%	81%
Helpful in Getting or Keeping Job	67%	69%

GOAL 6
Data Related to Objective A

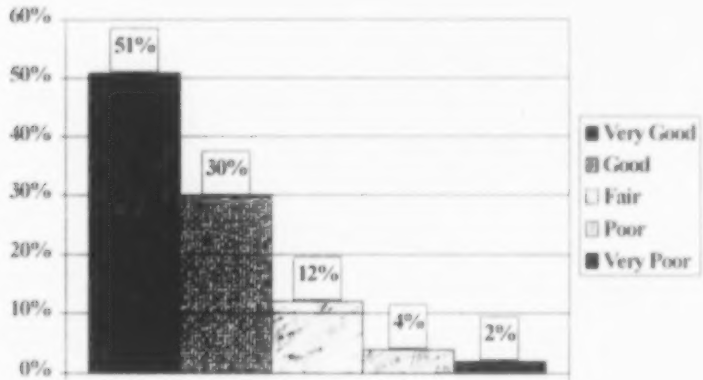
In 1997, the Quality Assurance/Quality Improvement Committee of the State Rehabilitation Advisory Council (SRAC) designed and conducted three surveys to evaluate consumer satisfaction with services provided by VESID. The surveys were developed with input from VESID staff, independent living staff, and employers; they evaluated consumer satisfaction from three perspectives:

- Individuals whose cases were closed "employed"
- Individuals whose cases were closed "not employed"
- Employers of individuals with disabilities.

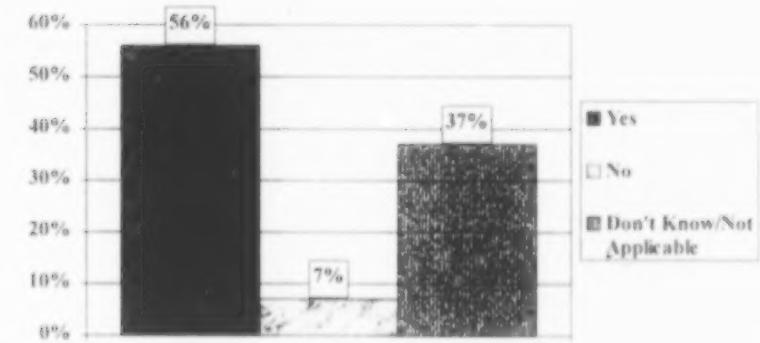
Results of these surveys are represented below.

Survey Responses from Individuals Obtaining Employment Through VESID

How would you rate the services you received from VESID?



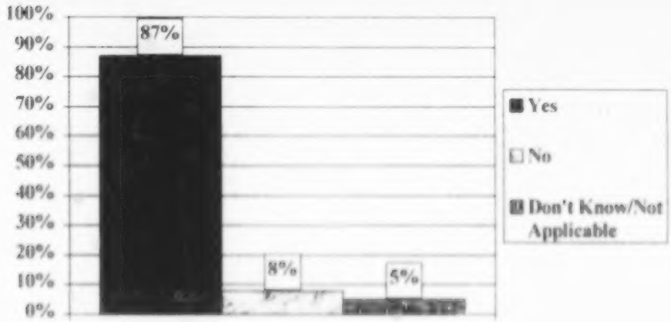
Were you satisfied with the services you received from other support agencies, organizations, Independent Living Centers and groups that VESID referred you to?



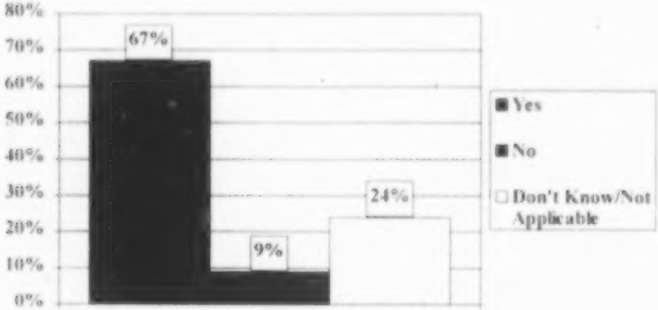
GOAL 6

Data Related to Objective A

Would you recommend VESID to another person?

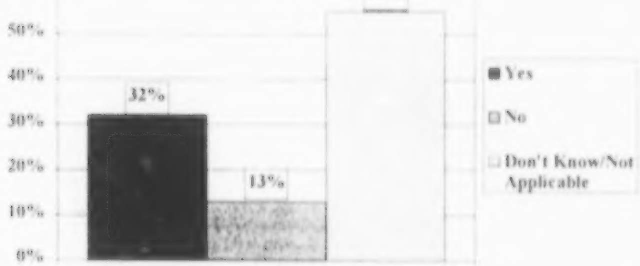


Were you satisfied with services VESID provided to you after you entered employment?
(504 respondents)



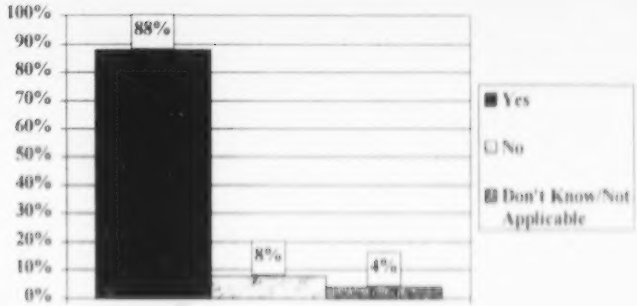
Survey Responses from Individuals Who Did Not Obtain Employment Through VESID

Were you satisfied with the services you received from other support agencies, organizations, Independent Living Centers and groups that VESID referred you to?



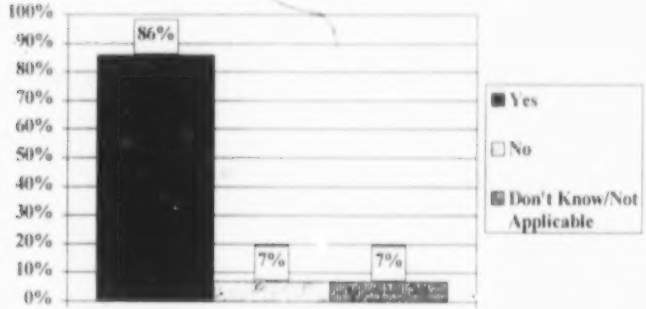
BEST COPY AVAILABLE

GOAL 6
Data Related to Objective A

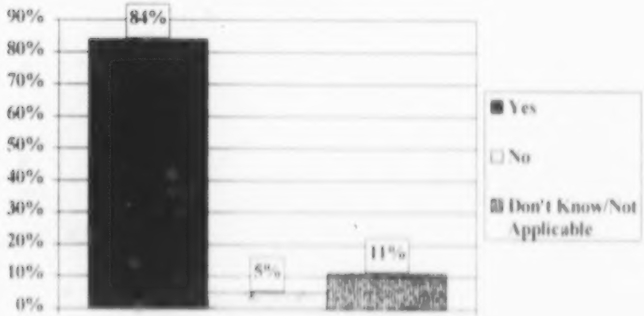


Did VESID staff treat you with respect?

Survey Responses from Employers of Individuals with Disabilities



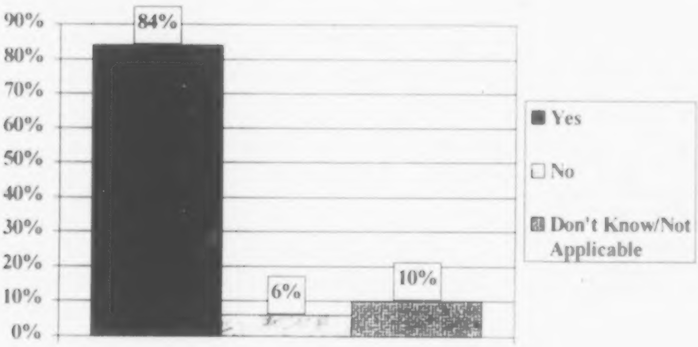
Do you feel VESID understands your company's employment needs?



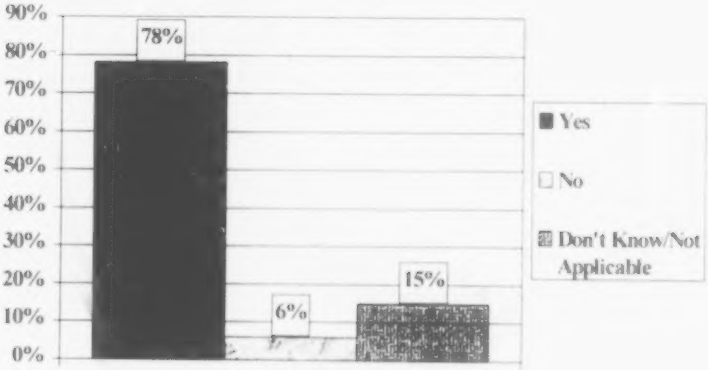
Does VESID provide services that are useful to your company?

GOAL 6
Data Related to Objective A

Did you feel that VESID sends you qualified candidates to be interviewed?



Does VESID respond promptly to your requests for job candidates?



OTHER PERFORMANCE DATA

DATA FOR COMPREHENSIVE SYSTEM OF PERSONNEL DEVELOPMENT

New York State's Comprehensive System of Personnel Development (CSPD) is responsive to the needs of students with disabilities, their families, educators and other appropriate personnel who provide educational programs and services to these students. Based on local needs assessments and State-identified needs, training, technical assistance, information dissemination and program planning activities are provided by the following components of the CSPD:

Special Education Training and Resource Center (SETRC)
Administrators Leadership Training Academy (ALTA)
Technology Resources for Education (TRE)
Partnership of Parents and Professionals (POPP)

During 1996-97:

- Training was provided to 174,359 individuals on 10 broad topics and to 196,108 participants on other topics identified by local and regional needs assessments.
- A planning tool, referred to as "Matrix of Personnel Development Quality Indicators," was implemented to evaluate the effectiveness of the training networks.
- Training networks provided support to school districts that were identified by the State as needing substantial improvement in student results relative to the goals and objectives contained in the SED Strategic Plan.

Total	232,710	100%

*The total number of participants by type of participant is less than the total number of participants by topic since the same participants attend training programs which cover more than one topic.

Comprehensive System of Personnel Development – Evaluation Instrument

PLANNING MATRIX OF PERSONNEL DEVELOPMENT QUALITY INDICATORS – JUNE 1996

	PLANNING	CONTENT	DESIGN	CLIMATE/ CULTURE	IMPLEMENTATION	EVALUATION
4 HIGH SUCCESS INDICATORS	MEANINGFUL PARTICIPATION OF ALL STAKEHOLDERS IN THE DEVELOMENT OF LONG RANGE PERSONNEL DEVELOPMENT PLANS, WITH IDENTIFICATION OF EXPECTED RESULTS.	CONTENT, SKILLS, KNOWLEDGE BASED ON RESEARCH AND RELEVANT TO DISTRICT/ BUILDING NEEDS AND ASSOCIATED WITH ATTAINMENT OF STUDENT RESULTS.	USES A VARIETY OF STRATEGIES, FORMATS, DELIVERY SYSTEMS, PRESENTATION MODELS AND TECHNIQUES TO MEET THE NEEDS OF DISTRICT PERSONNEL OVER A PERIOD OF TIME.	ADMINISTRATORS SERVING AS INSTRUCTIONAL LEADERS, MUTUAL RESPECT AND COLLABORATION AT ALL LEVELS, PERSONNEL DEVELOMPENT RECOGNIZED AS A POWERFUL CHANGE AGENT.	LONG-TERM AND ONGOING FOLLOW UP, OPPORTUNITIES FOR PARTICIPANTS TO PRACTICE SKILLS AND METHODOLOGY PRESENTED THROUGHOUT TRAINING, ONGOING COACHING AND TURNKEY TRAINING, STRONG EVIDENCE OF ADMINISTRATIVE SUPPORT TO CONTINUE WITH FOLLOW UP ACTIVITIES.	ONGOING DATA COLLECTION AND ANALYSIS LINKED TO PREDETERMINED STUDENT RESULTS, CONSISTENT WITH PERSONNEL DEVELOPMENT PLAN. ALL STAKEHOLDERS INVOLVED WITH EVALUATION AND ONGOING PLANNING CYCLE.
3	GROUP PLANNING PROCESS WITHOUT DEFINED RESULTS.	CONTENT BASED ON RESEARCH AND BUILDING NEEDS BUT NOT ASSOCIATED WITH ATTAINMENT OF STUDENT RESULTS.	PROVIDES SOME OPPORTUNITY TO EXPAND ON TOPICS.	STAFF DEVELOPMENT IS VALUED AS A POWERFUL CHANGE AGENT BUT TOP LEVEL LEADERSHIP IS NOT APPARENT.	FOLLOW UP ACTIVITIES (TECHNICAL ASSISTANCE, DISCUSSION, PARTICIPANT SHARING, ETC.) ARE ENCOURAGED, PRIMARILY AT THE GROUP LEVEL, WITH SOME ADMINISTRATIVE INVOLVEMENT.	STUDENT RESULTS ARE EVALUATED BUT NOT IN RELATION TO INTERVENTIONS PROVIDED THROUGH A PERSONNEL DEVELOPMENT PLAN.
2	PROCESS OWNED AND CONTROLLED BY ONE PERSON.	RESEARCH OR REGULATION DRIVEN WITH NO CONTEXT PROVIDED.	REGIONALIZED TRAINING, MENU APPROACH TO SELECTION.	STAFF DEVELOPMENT TOLERATED, NOT CONSISTENTLY AVAILABLE TO ALL STAFF.	FOLLOW UP OCCASIONAL, INFORMAL ADMINISTRATIVE SUPPORT MAY OCCUR BUT WITHOUT ADMINISTRATIVE STRUCTURE TO FACILITATE.	EVALUATIONS BASED ON PARTICIPANT REACTION TO SESSION (APPLAUSE METER).
1 LOW SUCCESS INDICATORS	SUPERFICIAL OR NO PLAN DEVELOPED, NO INPUT OF STAKEHOLDERS, TRAINING TOPICS SELECTED AS NEEDED.	NO OBVIOUS RELATIONSHIP OF TRAINING TO DISTRICT NEEDS OR IMPROVEMENT.	SINGLE PRESENTATION USING LIMITED PRESENTATION MODELS, OFTEN TO FILL AN AVAILABLE TIME SLOT, ONE-TIME TRAINING.	STAFF DEVELOPMENT NOT ENCOURAGED, MANDATORY PARTICIPATION OF UNWILLING AUDIENCE.	NO FOLLOW UP PROVIDED, VERY LIMITED OPPORTUNITY TO MONITOR AND REFINE SKILLS, ANY FOLLOW UP IS SELF-DRIVEN BY PARTICIPANT.	NO EVALUATION CONDUCTED.

PD-5:Report of Students with Disablities Exiting Special Education

July 1, 1996 to June 30, 1997

Report Heading Descriptions

LINE 1 = REGENTS DIPLOMA (HONORS)
LINE 2 = REGENTS DIPLOMA (REGULAR)
LINE 3 = LOCAL DIPLOMA
LINE 4 = H.S. EQUIVALENCY DIPLOMA
LINE 5 = I.E.P. DIPLOMA
LINE 6 = LOCAL CERTIFICATE
LINE 8 = REACHED MAXIMUM AGE

Drop-Out Rate Formula: Divide the number of students with disabilities that dropped-out (as reported on the PD-5) by the total number of students with disabilities ages 14 to 21 (as reported on the PD-1). Asterisks for the drop-out rate indicate that the school district had no students dropping-out and no students ages 14-21. Most of these school districts serve elementary students only or have a low student population.

Declassification Rate Formula: Divide the number of students with disabilities that were declassified (as reported on the PD-5) by the total number of students with disabilities (as reported on the PD-1). Asterisks for the preschool declassification rate indicate that the school district did not have any preschool students.

APPENDIX B-1
Participation and Performance on Pupil Evaluation Program (PEP) Tests
(Students with Disabilities)
1996-97 School Year

Please note, comparison data (Reference Group Summaries) are provided at the end of this appendix to facilitate comparison with appropriate similiar groups of school districts. Reference groups include, New York City, large four cities (Buffalo, Rochester, Syracuse, and Yonkers), other cities, suburban and rural districts (as defined in the decennial census). Other reference groups include the Need/Resource Capacity (N/RC) categories (see definition of these categories on page VI.3). Each school district's N/RC category is listed below using the following codes: 1- New York City; 2- Large Four Cities; 3- Urban/Suburban High N/RC; 4- Rural High N/RC; 5- Average N/RC; 6- Low N/RC. Additionally, data are presented for the 45 High Need Districts and the rest of the school districts (see list of the 45 High Need Districts and their selection criteria on page VI.4). The 45 High Need Districts are also asterisked (*) below.

APPENDIX B-2

Participation and Performance of Students with Disabilities on Regents Competency Tests (RCT)

1996-97

Please note, comparison data (Reference Group Summaries) are provided at the end of this appendix to facilitate comparison with appropriate similiar groups of school districts. Reference groups include, New York City, large four cities (Buffalo, Rochester, Syracuse, and Yonkers), other cities, suburban and rural districts (as defined in the decennial census). Other reference groups include the Need/Resource Capacity (N/RC) categories (see definition of these categories on page VI.3). Each school district's N/RC category is listed below using the following codes: 1- New York City; 2- Large Four Cities; 3- Urban/Suburban High N/RC; 4- Rural High N/RC; 5- Average N/RC; 6- Low N/RC. Additionally, data are presented for the 45 High Need Districts and the rest of the school districts (see list of the 45 High Need Districts and their selection criteria on page VI.4). The 45 High Need Districts are asterisked (*) below.

Appendix B-3
Participation and Performance* of Students with Disabilities on Selected Regents Examinations
1996-97

Please note, comparison data (Reference Group Summaries) are provided at the end of this appendix to facilitate comparison with appropriate similiar groups of school districts. Reference groups include, New York City, Large Four Cities (Buffalo, Rochester, Syracuse, and Yonkers), other cities, suburban and rural districts (as defined in the decennial census). Other reference groups include the Need/Resource Capacity (N/RC) categories (see definition of these categories on page VI.3). Each school district's N/RC category is listed below using the following codes: 1- New York City; 2- Large Four cities; 3- Urban/Suburban High N/RC; 4- Rural High N/RC; 5- Average N/RC; 6- Low N/RC. Additionally, data are presented for the 45 High Need Districts and the rest of the school districts (see list of the 45 High Need Districts and their selection criteria on page VI.4). The 45 High Need Districts are double asterisked (**) below.

APPENDIX D Count of Preschool and School-Age Students with Disabilities and Classification Rate
(December 1, 1996)

LINE 1 = Students in school district programs
LINE 2 = Students in another school district
LINE 3 = Students in BOCES
LINE 4 = Subtotal of lines 1, 2, and 3
LINE 5 = Students in approved private schools
LINE 6 = Total special education students

ALL STUDENTS includes both general and special education school-age students resident to the district

Data Note: School districts operating less than K to 12 programs may have data anomalies affecting classification rates due to differences in data collection procedures used by the State Education Department for general and special education students.

Comment and Suggestion Requests

Dear Reader:

The New York State Education Department is strongly committed to continuously improving education results for individuals with disabilities. High quality performance summaries and reports, including accurate and complete information, are essential for program evaluation and goal setting at the State and local levels. So that we may improve the quality and usability of the next edition of the Performance Report of Educational and Vocational Services and Results for Individuals with Disabilities for 1997-98, your comments regarding the value of this report would be appreciated. We would also appreciate your suggestions for improving the report.
